#### **■** Introduction

This Budget Paper reports on financial results of Government operations and its financial position, as well as providing detail with respect to the Government's Budget for the coming fiscal year and for the medium term.

This Budget Paper is divided into four sections.

**Section 1** provides information specifically required by the Legislature. This includes estimates of operating expenditure, operating revenue and balances under the balanced budget legislation, as passed by the Legislature in 1995 and strengthened in 2000. These Budget plans provide for the core functions of the Government under rules set out in that legislation. Section 1 sets out the Medium-Term Fiscal Framework and a summary of the Estimates of Expenditure and Revenue that are voted upon in the Legislature. The balanced budget legislation provides specific mechanisms for the stabilization of Provincial finances and repayment of debt through the Debt Retirement Fund.

Section 2 provides Summary Budget statements that incorporate results and plans for the consolidated operations of the Government, including the operations of Crown corporations and other Government entities, as well as changes in pension liabilities. Information is also provided on the Government's general purpose and guaranteed debt, refunding and other borrowing plans. These statements meet the standard of inclusion under generally accepted accounting principles of the Public Sector Accounting Board (PSAB) of the Canadian Institute of Chartered Accountants. They differ from the statements in Section 1 for a number of reasons. Because the results of Crown enterprises and the valuation of pension liabilities may be quite volatile on a year-to-year basis, the Legislature has determined that they should not fall under the provisions of the balanced budget act, which requires a balance be achieved on an annual basis. However, since 2000, the Government has taken new measures to address the pension liability within *The Balanced Budget*, *Debt Repayment and Taxpayer Accountability Act*. The provisions for fiscal stabilization and debt repayment are mechanisms which cannot be captured under the rules for the preparation of summary financial statements.

The Government takes full responsibility for the efficient and sound financial operation of the entire Government reporting entity as reported in the summary financial statements. It is a key commitment of this Government that Manitoba Hydro be retained as a Crown corporation, and that it continue to provide the lowest-cost energy to Manitoba individuals and industry, over the long run. Short-term fluctuations in revenues should not be the basis for decisions either on the operations of Hydro, or of the Government reporting entity as a whole.

**Section 3** provides additional financial information. A ten-year summary of financial results includes ratios to gross domestic product and per capita information. Comparisons with other jurisdictions are provided with respect to health and other program expenditures, debt servicing costs and debt.

**Section 4** provides a summary of progress made by this Government in its budgeting and reporting, in order to provide greater transparency and to meet the standards of reporting advanced by the PSAB, including new measures to be reflected in the Budget and accounts for 2004/05.

The Government provides this information in order to be fully transparent concerning its operations, while meeting specific requirements of the Provincial Legislature and of the legislation it has passed. The statements have been evolving toward full compliance with generally accepted accounting principles as outlined by PSAB. PSAB sets generally accepted accounting principles and current reporting standards for governments, some of which have changed over time.

The Budget and Financial Statements are not the only source of information provided to fulfill these objectives. In this regard, the PSAB notes:

Summary financial statements include the financial position and results of all the organizations a government controls. Because they are summary documents, they cannot be expected to fulfill all of the users' needs served by a government's financial reporting system. To do that, governments produce many kinds of other financial reports in addition to the financial statements. For example, individual entities prepare reports to comply with certain legislation; there are reports to measure and report on the performance of individual programs and activities; and there are special purpose reports designed to meet particular needs of specific users. In addition, governments set out their fiscal plan in budgets and estimates of expenses or expenditures. Certain information is better provided, or can only be provided, by financial reports other than summary financial statements. ("20 Questions About Government Financial Reporting". PSAB; CICA; 2003 p12. http://www.cica.ca/index.cfm/ci\_id/225/la\_id/1.htm)

#### Overview

Budget 2004 presents the Government's plans to maintain a steady course which addresses the priority concerns of Manitobans. The Budget is balanced under *The Balanced Budget*, *Debt Repayment and Taxpayer Accountability Act*. The Budget was prepared in a difficult fiscal environment, as the Province recovers from a number of events which occurred last year.

A sharp reduction in expected Equalization payments occurred at the end of the fiscal year, arising from relatively poor economic performance in much of Canada, and especially in Ontario, which lowered the standard on which entitlements are based. On the positive side, calculations of federal transfers were adjusted, based on 2001 Census results, to include all people for whom the Province had borne the cost of providing services in previous years. Manitoba was one of the few provinces which had higher population growth than previously estimated.

2003/04 fiscal results were also affected by:

- the value of the Canadian dollar, which rose sharply against that of the U.S., our major trading partner, and which resulted in slower economic and revenue growth;
- drought, which reduced water flows and impacted provincial revenues from Manitoba Hydro;
- the BSE crisis, which not only reduced farm receipts, but also required an unforeseen \$46 million injection to provide relief to producers; and
- one of the worst forest fire seasons on record, which required an expenditure of \$29 million above that budgeted for forest fire suppression.

The result of the BSE and forest fire situations was that the applicable disaster provisions of *The Balanced Budget, Debt Repayment and Taxpayer Accountability Act* were used to ensure that these crises could be addressed without jeopardizing essential public services.

Looking ahead, Budget 2004 provides the resources to maintain and improve services to Manitobans. It plans no draw on the Fiscal Stabilization Fund. Major personal or corporation income taxes continue to be reduced. A number of measures are taken to control costs, and there are some other fee and selective tax increases. Health, K to Senior 4 and post-secondary education and training, and family services and housing will receive increases which total \$206 million. Part of this additional funding for these priority programs, and all increases in other department expenditures, will be financed from savings and repriorization in other programs.

### ■ 2003/04 RESULTS

2003/04 forecast results presented above are based on the Third Quarter Report.

The 2003 Budget was prepared without the knowledge that the Province and Canada would face drought, the BSE crisis, an exceptionally large number of forest fires, a sharp rise in the value of the Canadian dollar and other adverse events that would affect the economy. The short-term challenges of 2003/04 have affected both revenue and expenditure. However, these challenges were met without major disruptions in Manitoba. The Province has been able to maintain services. Furthermore, the Province will be in compliance with the balanced budget act. A positive balance of \$5 million is projected in the Third Quarter Report. The \$96 million payment required under the act for repayment of debt and reduction of pension liabilities will be made. The exclusion of some disaster expenditures and the draw on the Fiscal Stabilization Fund are in keeping with the

letter and spirit of the balanced budget act. This act specifically addresses the goal of maintaining stability and sustainability in government operations over the long term. Maintaining programs despite adverse circumstances is in our long-term interest.

#### Revenue

As noted in the Third Quarter Report, 2003/04 revenue is now projected to be \$23 million below the 2003 Budget projection. Several sources of provincial own-source revenue are projected to be higher than budgeted, including personal and corporation income taxes, the retail sales tax and mining tax. However, lower revenue from Manitoba Hydro (\$52 million) and from Manitoba Lotteries Corporation (\$23 million) more than offset the revenue gains from other sources. Transfer revenue from the federal government will be \$9 million above the 2003 Budget estimate. Higher than projected population from the 2001 Census increased federal estimates of Manitoba's transfer revenue in the autumn of 2003, but were largely offset by entitlement reductions due to the weaker economic performance of Ontario and other provinces.

### **Expenditure**

The principal changes from budget were the additional funds required to provide support to cattle producers to mitigate the devastating effects of the BSE crisis, and to fund the exceptional costs of fighting forest fires. These two events required expenditure of \$75 million above budget. A further \$37 million was required for health care expenses, in addition to the provision in the 2003 Budget. Total program expenditure is projected in the Third Quarter Report to be \$168 million over Budget 2003. Public debt costs will be \$16 million below budgeted expenditure.

# Net Revenue/(Expenditure)

Net expenditure, resulting from lower than budgeted revenue and higher than budgeted expenditure including extraordinary expenditure relating to disasters, will be \$117 million, as compared with budgeted net revenue of \$58 million.

### **Balance under Balanced Budget Legislation**

The net result for the 2003/04 fiscal year will be a positive balance of \$5 million under the balanced budget act. \$96 million will be provided for repayment of general purpose debt and pension liability retirement. In keeping with the Fiscal Stabilization Fund's purpose of providing a cushion against unforeseen circumstances, a draw of \$143 million will be made from the Fiscal Stabilization Fund.

Note 1: The 2003/04 financial information has been restated to be consistent with the 2004/05 Estimates structure. This includes adjustments pertaining to the Province's tangible capital asset accounting policy as outlined in Section 4 of this Paper. This will put Manitoba in full compliance with capital asset accounting practices as prescribed by PSAB. In addition, the restated 2003/04 Budget incorporates \$68 million in expenditure voted in the Supplementary Estimates of Expenditure for Emergency Expenditure passed by Legislative Assembly in September 2003. This \$68 million, when combined with the approximately \$5 million in net fiscal impact of amortizing infrastructure capital assets, results in a restatement adjustment of \$64 million.

# ■ 2004/05 Budget

#### Revenue

Total revenue is projected to be up by 4.0%. Own-source revenue will grow by \$350 million, reflecting increasing population, more jobs, growing incomes and expenditures of Manitobans, a rebound in water power rentals and increased corporation and mining tax, along with the decisions introduced in this Budget. Transfer revenue from the federal government is expected to decline by \$58 million as compared to the amount received in 2003/04. The federal government did not extend the \$2 billion in supplemental funding provided through the Canada Health and Social Transfer into 2004/05, reducing Manitoba's transfer revenue by \$73 million. In total the federal government will provide \$104 million less in permanent health care funding to Manitoba in 2004/05. The Equalization renewal proposal put forward by the federal government provides a very modest increase in Manitoba's entitlements for 2004/05 of under \$10 million.

### **Expenditure**

The Budget forecast is based on expectations of a normal year with respect to disaster-related expenditure. Budgetary program expenditure is \$7,233 million, an increase of 1.4% over 2003/04 projected expenditure.

As noted, in accordance with revised accounting policy, amortization and interest costs associated with infrastructure assets will now be incorporated within departmental estimates. This will improve transparency and accountability with respect to the total cost of capital assets and is made in conjunction with our measures to comply with generally accepted accounting principles. General purpose public debt costs included under Statutory Appropriations will fall by 6.6% to \$239 million.

Total budgetary expenditure is \$7,472 million, an increase of 1.1% over 2003/04 projected expenditure.

#### **Net Revenue**

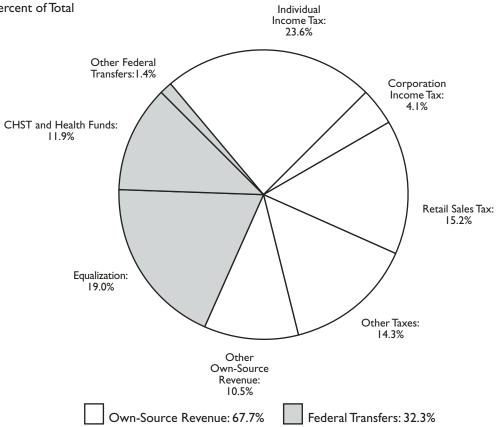

Growing revenue and constrained expenditure will result in net revenue of \$99 million, an improvement of \$211 million from the net expenditure required in 2003/04.

### **Balance under Balanced Budget Legislation**

The 2004 Budget provides a further \$96 million to be applied against general purpose debt and pension liabilities. The Debt Retirement Fund Allocation Committee has recommended that \$75 million be allocated to address pension liabilities. The projected balance under balanced budget legislation is \$3 million, with no draw from the Fiscal Stabilization Fund for fiscal year 2004/05.

Note 1: The 2003/04 information has been adjusted to be consistent with the 2004/05 Estimates structure.

### **■ Capital Investment**

Part B Capital Investment is required for the annual purchase or acquisition of tangible capital assets, such as buildings, machinery and equipment, furniture, and computers, which meet established guidelines for amortization (see Appendix B of the 2004/05 Estimates of Expenditure). Capital assets are amortized over their useful life and the amortization and interest costs are borne by departments that are responsible for each asset. In 2004/05, the Province's capital accounting policy has been changed to allow for capitalization of infrastructure, in accordance with the Canadian Institute of Chartered Accountants public sector accounting standards.

The costs of acquiring general assets as well as infrastructure assets are reflected in the annual operating fund estimates as Part B Capital Investment. The annual amortization and interest related to the past and current acquisitions are reflected in annual operating expenditures and recognized as costs related to capital assets.

### **■** The Medium-Term Fiscal Framework

The fiscal prospects for Manitoba and most other provincial governments are such that the Province will face some serious challenges over the medium term. Beyond the current fiscal year, the Provincial Government will continue to balance the budget, begin to replenish the Fiscal Stabilization Fund and put health care and other priority social programs on a sustainable track. In regard to the latter, it is clear that a strengthened financial partnership with the federal government is needed (see Budget Paper C – Restoring Fiscal Balance).

Over the next three years, 2005/06 to 2007/08, revenue is projected to increase at an average annual rate of 3.6%, a rate that reflects solid economic growth and increased federal support for health care. First Ministers will be meeting this summer to discuss health care reform and a long-term plan for federal funding. The medium-term fiscal framework assumes that, at a minimum, the federal government will build the \$2 billion additional CHST Supplement into the funding base as an ongoing commitment to health care beginning in 2005/06. Manitoba's share of this total would be \$73 million per year.

Note 1:3Q Adjusted Forecast

The Medium-Term Fiscal Framework reflects current forecasts and assumptions. Should future circumstances depart from these, budget decisions will reflect the changes.

This revenue growth takes place against the backdrop of healthy economic growth. According to the February 2004 Conference Board Forecast, Manitoba's nominal Gross Domestic Product is expected to grow at an average annual rate of 4.2% over the next three years. Real Gross Domestic Product is expected to average about 2.6% over this period.

Program expenditure is targeted to increase at an average annual rate of 2.9% over the medium term – a rate that would effectively sustain key public services and provide for modest improvements in areas of greatest priority, such as infrastructure and health care.

General purpose debt will decline. However, public debt costs are expected to rise to \$275 million in 2005/06, and to \$293 million by 2006/07, reflecting an assumption of higher interest rates.

While the 2003 Budget anticipated a small draw on the Fiscal Stabilization Fund in 2004/05, the 2004 Budget will be balanced without any draw for this year. It is projected that net revenue growth will allow the Government to start replenishing the Fund.

Debt reduction and the retirement of pension liabilities will continue. Beginning in 2005/06, the allocation to the Debt Retirement Fund will accelerate to \$110 million per year, in accordance with *The Balanced Budget, Debt Repayment and Taxpayer Accountability Act.* 

# **■ Special Funds Balances**

#### **Fiscal Stabilization Fund**

In 2003/04, the draw from the Fiscal Stabilization Fund will be \$143 million. The positive balance in the operating fund, projected at \$5 million, is deposited in the Fiscal Stabilization Fund. The budgeted draw for 2004/05 is nil. The closing balance of the Fund is projected to be \$106 million.

#### **Debt Retirement Fund**

In accordance with *The Balanced Budget, Debt Retirement and Taxpayer Accountability Act*, a \$96 million deposit to the Debt Retirement Fund is required in each of 2003/04 and 2004/05.

The Fund earned \$8 million in interest in 2003/04. For 2003/04, the Allocation Committee determined that the most cost-effective allocation was \$75 million to pension liability, rather than the \$48 million budgeted amount, and \$21 million against general purpose debt. The Allocation Committee also has determined that, for the 2004/05 fiscal year, the allocation is \$75 million to pension liability.

The debt retirement provisions of the Act require that at least once every five years, the Fund be collapsed and all amounts be allocated to the Province of Manitoba Sinking Fund (debt) or to the Pension Assets Fund. Therefore, \$202 million has been applied against general purpose debt, comprised of the \$181 million opening Fund balance plus \$21 million from the allocation. The transfer to the Sinking Fund will occur in April 2004.

#### Pension Assets Fund

The Debt Retirement Fund Allocation Committee determined that, for the second consecutive year, \$75 million should be allocated to the Pension Assets Fund for 2004/05.

The Fund earned net interest of \$37 million in 2003/04, recovering from the effects of market downturns experienced in 2002/03. The Budget projects a return to more moderate rates in 2004/05.

The Fund is expected to have a balance of \$363 million by the end of the 2004/05 fiscal year.

# ■ Report on Consolidated Operations and Summary Budget Forecast

For the first time, Manitoba is presenting a prospective view on the Consolidated Operations of the Government, and a forecast of the Summary Budget over the medium term.

This presentation uses the revenue and expenditure forecasts from the Medium-Term Fiscal Framework on page 13 of this Budget Paper.

The Summary Budget represents the entire Government reporting entity. It reflects the balance under balanced budget legislation, the changes in the balances of special funds, the net contributions of Government enterprises and Crown corporations, and the changes in pension liabilities and pension fund assets.

The result of the interaction between the Operating Fund and the transfers to or from the Debt Retirement Fund and Fiscal Stabilization Fund, provide the balance under balanced budget legislation. Positive balances must be transferred to the Fiscal Stabilization Fund, leaving the Operating Fund Balance at \$0 after the transfer.

# ■ Consolidated Operations and Summary Budget Forecast

Adjustments to determine Consolidated Net Income/(Expenditure) include:

- Total changes in Special Funds;
- Contributions of enterprises and Crown corporations;
- Consolidation adjustments;
- Pension items; and
- For 2003/04, the adjustment for disaster-related expenditure.

The table on the next page includes these elements and related items, and provides the forecast Consolidated Net Income/(Expenditure).

### ■ Total Changes in Special Funds

There are a number of special funds created by the Legislature for specific purposes. The two principal funds are the Fiscal Stabilization Fund and the Debt Retirement Fund. There are also a number of small, special-purpose funds – for example, the Mining Community Reserve Fund and the Quarry Rehabilitation Reserve – that in combination are projected to have little effect on the overall balance.

In 2004/05, the funds held in the Debt Retirement Fund will be withdrawn and applied to reduce outstanding debt, in accordance with the provisions of debt repayment legislation, which mandates collapsing the Fund at least once every five years. From the Fund balance of \$277 million, \$75 million will be allocated to the Pension Assets Fund, and \$202 million to the Sinking Fund. Since the Debt Retirement Fund will also receive a \$96 million contribution, the net change in the Fund will be a reduction of \$181 million.

The \$202 million transfer is not considered an expense for accounting purposes. A consoldation adjustment is required. Discounting this transfer, Special Funds will achieve a positive result of \$24 million in 2004/05.

In the medium term, the FSF and DRF balances will grow as deposits are made from the Operating Fund.

# Contributions of Government Enterprises and Crown Corporations

The net changes in operating balances (profits or losses) of Government enterprises, Crown corporations, entities and Special Operating Agencies during the fiscal year are shown in the Summary Budget. The Crown corporations having the greatest net impact on the consolidated financial results are listed. The contributions of other Government entities are included in a single entry.

An entry of note is the projected result of Manitoba Hydro for the 2003/04 fiscal year. Due to the effects of a prolonged drought on water flows, Manitoba Hydro is projected to finish its year with a loss on operations of \$359 million. For fiscal year 2004/05, Manitoba Hydro is expected to return to a profit position. Approximately the same level of profit is forecast for each year of the medium term.

### ■ Consolidation Adjustments

Consolidation adjustments are made to prevent double counting of revenue or expenditure items between the Government and its related entities. These are:

- The full amount of profits from Manitoba Lotteries Corporation and the Liquor Control Commission are included in Operating Fund revenue, and so are fully included in consolidation adjustments.
- Revenue-sharing payments from Special Operating Agencies are included in operating revenue and are deducted here.

#### **■** Balance before Pension Items

The consolidated balance before considering pension liability will return to a positive position in 2004/05, a balance of \$51 million, after a forecast negative result for 2003/04 of \$453 million.

Over the medium term, this balance will remain positive and increase.

#### ■ Pension Items

Upon coming into office, our Administration put into place a plan to retire the general purpose debt and to eliminate the Government's pension liability. Prior to this, it was projected that pension liability would grow to \$8.4 billion by 2028, and would continue to grow after that.

The 2000 Manitoba Budget introduced a comprehensive approach to address both debt and pension obligations. The plan provides for debt and pension obligation funding of \$96 million per year until 2004/05, and \$110 million per year over the medium term. In addition, departments were directed to match employee pension contributions for employees hired after October 2002.

This forecast projects an allocation from the Debt Retirement Fund of \$75 million to the Pension Assets Fund in each of 2003/04 and 2004/05, and \$82.5 million per year over the medium term. Interest earnings and net contributions from departments and Crown corporations produce the additional increases in the Pension Assets Fund.

# **■** Consolidated Net Income/(Expenditure)

The Summary Budget represents the entire Government reporting entity as defined in Schedule 8 of the Summary Financial Statements of the Public Accounts.

The last year has been very challenging for Manitobans, and for its Crown entities. Drought and reduced water flows affected Manitoba Hydro's operations; BSE and low cattle prices affected the farm community, Government supports increased dramatically; forest fires caused several temporary relocations and required disaster expenditures. With disaster expenditures up, and Crown enterprise revenue down, the Consolidated Net Expenditure for 2003/04 is forecasted to be \$531 million.

For fiscal year 2004/05, although federal transfer payments are expected to be lower than in 2003/04, own-source revenues will increase, and Manitoba Hydro is expected to return to a profitable position. The consolidated net expenditure for 2004/05 will total \$58 million, an improvement of \$473 million from 2003/04 results. Over the medium term, the forecast provides for positive results, with strong growth in 2007/08.

# ■ Loan Act Requirements

The following table reflects expenditure authority to be included in *The Loan Act*, 2004.

# Incremental Capital Authority Requirements for Non-Budgetary Programs, 2004/05

# **■** Borrowing Requirements

Manitoba's borrowing requirements for both general and self-sustaining purposes will total \$2.3 billion in 2004/05. A total of \$1.6 billion is required for refunding. The remainder is required for self-sustaining programs, including Manitoba Hydro, capital investments and disaster funding. Incremental capital authority requirements totalling \$0.89 billion are provided by *The Loan Act*, 2004.

- Note 1: The Canadian Dollar Valuation is calculated using the foreign currency exchange rates in effect at March 31, 2004 and at March 31, 2003. As at March 31, 2004, the U.S. dollar exchange rate was \$1.3105 (2003 \$1.4693).
- Note 2: Direct and Guaranteed Debt are payable in Canadian and U.S. dollars. As at March 31, 2004, total Gross Debt was payable 84% in Canadian dollars and 16% in U.S. dollars. Of this total, General Government Program Debt and Other Debt was 100% payable in Canadian dollars (97% at March 31, 2003) while U.S. dollars exposure was nil (3% at March 31, 2003). Manitoba Hydro Debt was payable 57% in Canadian dollars (47% at March 31, 2003) and 43% in U.S. dollars (53% at March 31, 2003).
- Note 3: The above debt was issued for the following purposes:

|                                   | March 3        | 31,2004                  | March 31, 2003    |                      |  |

|                                   | 14,971,231 (No | ote 5) 12,841            | 14,554,274        | 12,548               |  |

- Note 4: Per capita data is based upon population figures at January 1, 2004 and April 1, 2003 as reported by Statistics Canada.
- Note 5: General Government program debt decreased by \$38 million due to the deposit to the Debt Retirement Fund. All other debt increased \$455 million due to the continued consolidation of hospital facilities debt on to the Province's records, combined with Provincial Part B capital requirements, and Manitoba Hydro's new capital requirements, offset by an improved Canadian dollar.

Note 5: Under balanced budget legislation, disaster-related expenditures may be written directly to accumulated deficit. In 2003/04, the effect of the BSE crisis, drought and forest fires required extraordinary emergency expenditures to which this provision applies.

Note 6: Debt is as of March 31, 2004.

Note 7: Now reflects pension liability per summary financial statements. In previous years, amount excluded unamortized gains and losses resulting from actuarial valuations.

# Manitoba's Relative Position Among Provinces

Manitoba continues to maintain its reputation for fiscal prudence. The Province's measured approach to balancing the budget, managing its debt and pension liabilities, and dealing with cost pressures in health and other key program areas has been acknowledged by both the financial industry and credit rating agencies. Last year, both Moody's Investors Service and Dominion Bond Rating Service recognized Manitoba's recent fiscal progress by boosting the Province's credit ratings.

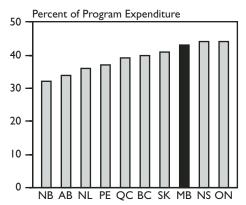

Manitoba has one of the most efficient and costeffective governments in Canada. As the adjoining charts indicate, per capita total expenditure was third-lowest and per capita program expenditure was fourth-lowest among provinces in 2003/04.

Effective debt management has contributed to significant reductions in the annual cost of servicing the Provincial debt. Over the last five years, annual debt servicing costs have declined by \$177 million. As a share of the total Provincial budget, debt servicing costs have been halved over the past five years. Annual debt servicing costs in Manitoba, both as a share of total budgetary expenditure and on a per capita basis, are the second-lowest among provinces.

The practical consequence of this strong financial performance is that Manitoba is better able to maintain its commitment to major health and social programs than otherwise would be the case. In 2003/04, heath expenditure was 43% of total program spending in Manitoba, third-highest among provinces and above the national average of 39%.

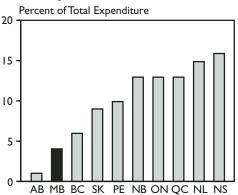

Note: Interprovincial comparisons are based on provincial mid-year financial statements. Since not all provincial governments will have tabled their budgets prior to publication, the pre-budget estimates were used for all provinces to ensure comparability.

### ■ Improving Transparency and Accountability

The Government continues to strive to improve transparency concerning its operations, while meeting specific requirements of the Provincial Legislature and the legislation it has passed. The financial statements have kept pace with generally accepted accounting principles as outlined by the Public Sector Accounting Board of the Canadian Institute of Chartered Accountants.

# **■** Improved Reporting

In its journey to improved disclosure, the Government has been assisted by the recommendations of the Auditor General. For instance, when expressing his concerns regarding confusion over separate financial statements for the Operating Fund and the consolidated reporting entity in his March 29, 1999 press release on the Public Accounts, he identified two courses of action:

- 1. stop producing financial statements on the Operating Fund; or
- 2. combine the summary financial statements into one volume so that their interrelationships would be more transparent.

The latter recommendation was adopted in the current Administration's first set of Public Accounts for 1999/2000.

In considering the former, many factors were assessed, including the budget laws of Manitoba and the views of the Public Sector Accounting Board previously stated on page 2 of this Budget Paper.

Based on this, we have continued to produce the Operating Fund special purpose financial statements in the interest of providing readers with a comprehensive reporting on the financial affairs of government. Interested parties are encouraged to access all the reports of the Government of Manitoba which are provided for the information of the Legislature and the public.

Following up on the Auditor General's further recommendations, the Government began issuing comprehensive annual reports in 2000/01. This fulfilled our commitment to provide more comprehensive reporting on the Government's fiscal results. These reports include not only financial statements, but also discussion and analysis. Further, they include financial and economic indicators for the Government's central operations, as well as for the entire Government reporting entity.

The Auditor General commended the Government in four successive reports on the Public Accounts, from 2001 to 2003, for the continuous improvement achieved in its accounting and reporting practices. Among an extensive list of these improvements are the recognition of the unfunded liability for future benefits for employees of non-devolved health care facilities, the introduction of commentary on environmental issues, improved notes and schedules, and improved disclosure in a large number of technical areas, bringing government's accounting practices closer to full compliance with generally accepted accounting principles for public sector.

In 2001/02 for the first time, a Summary Budget was presented that shows the entire Government reporting entity.

Beginning in 2002/03, the Report on Consolidated Operations includes the Summary Budget Forecast, and more complete explanations of the components of the summary financial statements. The 2004/05 Budget, for the first time, provides a forward-looking approach to Summary Budgets, with forecasts of summary results through to 2007/08. Further, for 2004/05, a statement on the Pension Assets Fund has been included.

# Capital Acquisitions

The Government introduced budgetary measures for considering the full cost of capital assets in program costs. The budget for the acquisition cost of general assets has been reflected in Part B of the Estimates since 1999/2000, and the related annual amortization costs have been voted as part of departmental appropriations. In 2002/03, the interest costs relating to capital acquisitions was also included in department program costs. This has resulted in the full cost of capital acquisitions being included in overall departmental program costs, providing for greater departmental accountability for capital expenditures.

# **■** Infrastructure Capitalization

For 2004/05, Manitoba is introducing a capitalization policy for its infrastructure assets.

By way of explanation, general tangible capital assets are consumed by government in providing government services, and use is usually restricted to government purposes such as buildings and computer equipment. Infrastructure assets are assets which are consumed by the general public and whose access is generally not restricted such as roads and parks.

PSAB requires infrastructure assets to be recorded. Prior to this year, tangible capital for infrastructure has not been not recorded as assets, pending the results of a special study on infrastructure by PSAB. Now that the PSAB Research Study on Infrastructure has been released, and confirms the applicability of capitalization for infrastructure, the Government is proceeding to value and recognize infrastructure in its accounts. Infrastructure assets will now be treated in the same manner as other tangible capital assets of government, as described in the Capital Acquisitions section above.

This will now put Manitoba in full compliance with the capital asset accounting practices prescribed by PSAB.

# Pension Accounting

Departments began funding the cost of matching pension contributions for employees hired on or after October 1, 2002 from their appropriations. This funding is being directed to the Pension Assets Fund, in addition to other contributions being made through the Debt Retirement Fund. The cost of the pension benefits thus begins to be reflected in the various programs across government. It also accelerates the Government's plan to address the outstanding pension liability.
