SUMMARY OF 2012 TAX MEASURES

A negative amount represents a tax reduction.

A negative amount represents a tax reduction.	2012/13	Full Year
	(Millions of Dollars)	
Ongoing Reductions ⁽¹⁾		
Personal Tax reductions	-27.5	-47.0
Business Tax reductions	-6.0	-6.0
	-33.5	-53.0
Personal Measures		
Dividend Tax Credit reduced	16.9	13.5
	16.9	13.5
Health and Environmental Measures		
Tobacco Tax increased	9.7	10.0
Fuel Tax increased	44.5	48.6
Nutrient Management Tax Credit introduced	-0.1	-0.3
	54.1	58.3
Business Measures		
Data Processing Investment Tax Credit introduced	-	-
Film and Video Production Tax Credit enhanced	-	-0.1
Co-op Education and Apprenticeship Tax Credit enhanced Corporation Capital Tax on Financial Institutions increased	-0.3 17.4	-8.0 11.6
Corporation Capital lax on Financial Institutions increased		
	17.1	3.5
Sales Tax Measures	95.5	106.5
Technical and Administrative Amendments	0.4	0.5
Total Changes, 2012 Budget	184.1	182.3
Total Changes, including Ongoing Tax Reductions	150.6	129.3

Tax reductions previously announced that take effect after 2011:
 - increased seniors' Education Property Tax Credit
 - increased basic personal amount, spousal amount and eligible dependent amount

- increased take-up in Tuition Fee Income Tax Rebate
 - enhanced R&D Tax Credit refundability

PERSONAL MEASURES

Dividend Tax Credit

(2012/13 revenue impact: +\$16.9 million)

The Dividend Tax Credit on eligible dividends paid to shareholders by companies subject to the general corporation income tax rate will be decreased from 11% to 8%, commencing with the 2012 taxation year.

The estimated additional full-year revenue is \$13.5 million.

For more information, please contact Location A, page C7.

HEALTH AND ENVIRONMENTAL MEASURES

Tobacco Tax

(2012/13 revenue impact: +\$9.7 million)

The Tobacco Tax rate is increased effective midnight, April 17, 2012. The rate per cigarette will increase from 22.5¢ to 25.0¢; the rate on fine-cut tobacco will increase from 21.5¢ to 24.0¢ per gram; and the rate on raw leaf tobacco will increase from 20.0¢ to 22.5¢ per gram.

The estimated additional full-year revenue is \$10.0 million.

For more information, please contact Location C, page C7.

Fuel Tax

(2012/13 revenue impact: +\$44.5 million)

The fuel tax rate on unmarked gasoline and diesel fuel will increase from 11.5¢ per litre to 14.0¢, effective May 1, 2012. The 11.5¢ rate had been in effect since 1993 for gasoline and since 2004 for diesel fuel.

Marked gasoline will be subject to a 3.0¢ per litre fuel tax rate, effective May 1, 2012.

The estimated additional full-year revenue is \$48.6 million.

For more information, please contact Location C, page C7.

Nutrient Management Tax Credit

(2012/13 revenue impact: -\$0.1 million)

Agricultural producers will be eligible for a new, refundable Nutrient Management Tax Credit. This income tax credit is one component of the Manitoba Government's strategy to facilitate implementation of amendments to *The Environment Act* introduced in *The Save Lake Winnipeg Act*. The credit will be equal to 10% of the capital cost of prescribed nutrient management equipment that is designed to meet water quality requirements. The assets must be acquired and available for use after April 17, 2012 and before 2016.

Capital investments that qualify for the credit are environmentally sound systems installed for use in Manitoba that reduce the risk of nutrient transport to water and help to improve the water quality of Lake Winnipeg. These will include: solid-liquid separation systems, anaerobic digesters, gravity settling tanks, manure treatment systems, and manure composting facilities. Also included are storage tanks suitable for winter manure storage by operators with fewer than 300 animal units.

The costs associated with electrical installations, plumbing, pumps, piping and groundwork required for the installation of the eligible systems are included in the capital cost for purposes of calculating the tax credit. Costs incurred and paid to acquire the system and make it operational are also included, such as engineering, design and installation costs. Borrowing costs are not eligible, and tax creditable capital costs will be net of any government assistance received or receivable on the eligible investment.

Both agribusiness corporations with a permanent establishment in Manitoba, and unincorporated individuals engaged in farming who are residents of Manitoba, are eligible for this support. Where the agricultural operations are owned by a partnership, the total tax credit will be allocated among those partners who reside in Manitoba.

The estimated full-year tax saving for agricultural producers is \$0.3 million.

For more information, please contact Location A, page C7.

BUSINESS MEASURES

Data Processing Investment Tax Credit

(2012/13 revenue impact: not applicable)

In order to position Manitoba as a high technology data processing centre investment location, a refundable corporation income tax credit will be established for property purchased or leased by an eligible corporation after April 17, 2012 for use in Manitoba. The corporation must have a permanent establishment in Manitoba and its primary business activity, including the activities of its affiliates, must be data processing.

The tax credit will be equal to 4% on the capital cost of new qualified property that is a building and 7% on the capital cost of new qualified property that is machinery or equipment. The property must be purchased or leased by the company for use in its data processing centre in Manitoba and be available for use after April 17, 2012 and before 2016. New qualified property that is purchased or leased to replace or improve property that previously qualified for the tax credit will also be eligible for the tax credit.

The tax credit will effectively offset Manitoba sales tax on the qualified property.

For more information, please contact Location A, page C7.

Film and Video Production Tax Credit

(2012/13 revenue impact: negligible)

Companies starting a film or video production after April 17, 2012 will be able to claim accommodation costs incurred and paid up to \$250 per night per unit as eligible tangible property expenditures for purposes of calculating the cost-of-production tax credit.

The estimated full-year tax saving for film and video producers is \$0.1 million.

For more information, please contact Location A, page C7.

Co-op Education and Apprenticeship Tax Credits

(2012/13 revenue impact: -\$0.3 million)

To enhance support for hiring apprentices and journeypersons, particularly early-level apprentices outside Winnipeg, three components of the Co-op Education and Apprenticeship Tax Credits will be enhanced.

- The Early-Level Apprentice Hiring Incentive (currently 10% of wages and salaries up to a maximum of \$2,000 per year per apprentice) is enhanced to 15% of wages and salaries up to a maximum of \$3,000. This component of the program is also expanded to cover employers eligible for the federal Apprenticeship Job Creation Tax Credit, who will receive a top-up to be treated consistently with other Manitoba tax credit recipients.
- The Advanced-Level Apprentice Hiring Incentive (currently 5% of wages and salaries up to a maximum of \$2,500 per level per employee) is doubled to 10% of wages and salaries up to a maximum of \$5,000.
- The Journeypersons Hiring Incentive (currently 5% of wages and salaries up to a maximum of \$2,500 per year per employee) is also doubled to 10% of wages and salaries up to a maximum of \$5,000.

These enhancements are available to employers of apprentices who complete a level after 2012, and employers of journeypersons who become newly certified after 2012. The tax credit is calculated based on wages and salaries paid to qualified employees, net of any support from government or a public authority.

The enhancements are part of a new, more comprehensive government initiative to support apprenticeship, which includes a Rural and Northern Apprenticeship Strategy. Under this strategy, an additional 5% tax credit will be available for employers who hire early-level apprentices who normally reside outside of Winnipeg and who normally report to an employer's office in rural and northern Manitoba.

	Level 1 and 2 Apprentices	Level 3, 4 & 5 Apprentices	Newly Certified Journeypersons
Current			
Tax Credit	10%	5%	5%
Maximum Credit	\$2,000	\$2,500	\$2,500
Budget 2012			
Winnipeg			
Tax Credit	15%	10%	10%
Maximum Credit	\$3,000	\$5,000	\$5,000
Rural/Northern			
Tax Credit	20%	10%	10%
Maximum Credit	\$4,000	\$5,000	\$5,000

Improvements to Apprenticeship and Journeyperson Tax Credits

All components of the tax credit are fully refundable. Eligible employers include taxable corporations or exempt corporate entities (including not-for-profit agencies, Manitoba Crown entities, municipalities, universities, schools and hospitals). Unincorporated employers may claim the refundable credit on their individual income tax return.

The estimated full-year tax saving to employers from these enhancements is \$8.0 million.

For more information, please contact Location B, page C7.

Corporation Capital Tax on Financial Institutions

(2012/13 revenue impact: +\$17.4 million)

The 3% Corporation Capital Tax on Financial Institutions is increased to 4%, commencing with taxation years ending after April 17, 2012.

The estimated additional full-year revenue is \$11.6 million.

For more information, please contact Location C, page C7.

SALES TAX MEASURES

(2012/13 revenue impact: +\$95.5 million)

The following personal services will be taxable, effective July 1, 2012: spa treatments, non-medical skin and nail services (such as pedicures, manicures and facials), hair services (including haircuts, hairstyling, hair removal and augmentation), tattooing and piercing. No sales tax will apply to haircuts costing less than \$50.

Sales tax will be applied to prescribed insurance premiums under a contract of insurance, effective July 1, 2012, other than for health, accident or sickness, Autopac, or individual life insurance. This includes property and casualty insurance, group life insurance, trip cancellation insurance, baggage insurance, and land titles insurance. The tax will apply where the insured is a person resident in Manitoba or the premiums are paid in respect of property located in Manitoba.

The estimated additional full-year revenue from these sales tax measures is +\$106.5 million.

For more information, please contact Location C, page C7.

TECHNICAL AND ADMINISTRATIVE MEASURES

(2012/13 revenue impact: +\$0.4 million)

Technical amendments will be made to the Mineral Exploration Tax Credit to ensure it operates as intended, including where credits earned in a higher tax credit year are carried back to a year where lower tax credits were provided.

Now that several residential properties have been designated for tax increment financing, the Community Revitalization Levy paid by residents will be eligible for the Education Property Tax Credit.

To encourage improved tax remittance compliance, the interest rate on tax debts owing under provincially administered taxes and refundable Manitoba personal income tax credits will increase from the prime interest rate plus four percentage points to the prime interest rate plus six percentage points, effective on accounts receivable starting July 1, 2012. The fee for dishonoured taxation payments under provincially administered taxes will be increased from \$20 to \$25.

The following changes will be made to the Retail Sales Tax.

- To reduce tax administration costs for businesses, the tax return filing frequency will be reduced, allowing 17,000 businesses to file their sales tax returns less often.
- The existing formula regarding the application of sales tax on the taxable use of demonstrator vehicles will be updated.
- The fee for dishonoured taxation payments will be updated to reflect increased costs an increase of \$5.00 per item.

The Neighbourhoods Alive! Tax Credit will be amended, retroactive to April 12, 2011 when the credit began, as follows:

- allowing a corporation up to four years to achieve the minimum \$50,000 donation threshold;
- allowing a corporation to make an up-front donation of up to \$200,000 in the first year, and provide in-kind service contributions to earn the maximum credit in each of the subsequent four tax years; and
- limiting in-kind contributions to earn the credit to the first five years of the social enterprise.

Enhanced enforcement measures respecting Tobacco Tax and other taxes will be implemented under *The Tax Administration* and *Miscellaneous Taxes Act*.

The estimated additional full-year revenue from these technical and administrative measures is \$0.5 million.

For more information, please contact Location A, B or C, page C7.

MANITOBA INCOME TAX SAVINGS FOR TYPICAL TAXPAYERS

Note: Some values may differ from previous years' tables due to changed assumptions regarding pension income splitting and the Personal Tax Credit.

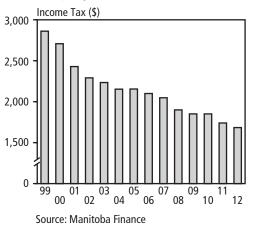

¹ Taxfilers in the single and family examples have earned income and pay Canada Pension Plan and Employment Insurance premiums. In the two-earner family, one taxfiler earns 60% of the income and the other earns 40% and pays child-care fees. The Fitness Tax Credit and the Children's Arts and Cultural Activity Tax Credit are claimed for one child in both family examples. Where applicable, tax payable has been reduced by the Personal Tax Credit.

² For the senior couple, both receive the Old Age Security Pension and each spouse splits private pension income in applicable tax years.

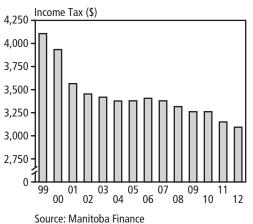

Note: Income does not reflect Universal Child Care Benefit entitlements but entitlements have been used to determine year-over-year savings.

MANITOBA INCOME TAX SINCE 1999

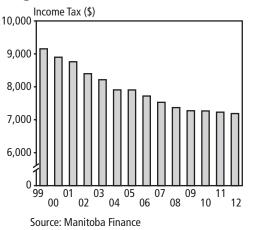

One-Earner Family of Four at \$40,000

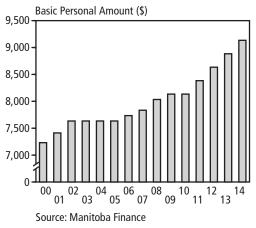

Two-Earner Family of Four at \$60,000

Single Individual at \$70,000

The Basic Personal Amount

¹ Top marginal provincial rates include surtaxes.

² The premium for BC is the maximum family rate. ON calculates premiums based on taxable income: for incomes of \$20,000 or less the premium is zero and the maximum premium of \$900 is reached at an income of \$200,600. QC calculates premiums for the Prescription Drug Plan on net income: maximum \$600 for a single person and \$1,200 for a family, and the Parental Insurance Plan Premiums on insurable earnings of up to \$66,000; maximum \$369. The QC Health Contribution Fund is income tested; maximum per adult is \$200.

³ MB exempts firms with payrolls of less than \$1.25 million and a graduated rate for firms with payroll up to \$2.5 million. ON provides a payroll deduction of \$400,000 for all employers. QC has graduated rates for firms with payrolls under \$5 million. NL exempts firms with payrolls of less than \$1 million.

⁴ MB exempts small financial institutions with less than \$4 billion in taxable paid-up capital. SK has a reduced tax rate for small financial institutions with less than \$1.5 billion in taxable paid-up capital.

⁵ Provincial gasoline taxes are fixed rates per litre. PE includes both a variable (maximum of 8.7¢/l) and a fixed (7.1¢/l) tax. The rate in BC includes 6.75¢/l dedicated to the BC Transportation Financing Authority and the carbon tax rate of 6.67¢/l for gasoline. ON, QC, NB, NS and NL apply provincial sales tax.

⁶ Provincial diesel fuel taxes are fixed rates per litre. PE includes both a variable (maximum of 8.7¢/l) and a fixed (11.5¢/l) tax. The rate in BC includes 6.75¢/l dedicated to the BC Transportation Financing Authority and the carbon tax rate of 7.67¢/l for diesel. Montréal has an additional levy of 3.0¢/l and QC imposes a carbon tax of 0.8¢/l on petroleum companies (which, it is assumed, is passed on to consumers). ON, QC, NB, NS and NL include provincial sales tax based on average pump prices.

⁷ Provincial sales tax applies to tobacco products in all provinces except AB, PE and QC.

Appendix 1: MANITOBA TAX EXPENDITURES, 2011/12

Introduction

Governments use the tax system to pursue social, cultural and economic objectives. A tax expenditure is measured as a deviation from a benchmark tax base. The expenditure can be in the form of a deduction, credit, preferential rate, deferral or exemption. Tax expenditures may target taxpayers (ex: individuals, corporations); activities (ex: farming, film production, manufacturing); property (ex: machinery, equipment); sources of income (ex: pensions); transactions (ex: RRSP contributions); or events (ex: involuntary dispositions).

Accounting for Tax Expenditures

Certain tax expenditures are treated as departmental expenditures, which are subject to review and approval by the Legislature, and are published annually as an individual line item in the Estimates of Expenditure in public accounts.

Other tax expenditures are absorbed into revenue estimates, reducing government revenues that would otherwise have been available for various direct expenditures. Tax expenditure accounts help to enhance the transparency of program expenditures and promote public accountability for tax credits that are absorbed into tax revenue.

Limitations of Tax Expenditure Accounting

Tax expenditure accounting has important limitations that must be considered when interpreting results. The value of each tax expenditure is estimated individually. Interactions between provisions are not taken into account. This has two effects. First, estimates for two or more tax expenditures cannot be added together to arrive at a combined value. Second, changing any one tax expenditure might affect the value of another tax expenditure. For example, changing something that is a deduction from income, such as RRSP contributions, would change reported net income. This in turn would change the value of tax credits, such as Manitoba's Personal Tax Credit, that depend on net income. The combined value of the tax expenditures listed in the account is substantially less than the sum of the individual items.

Reporting Tax Expenditures

Manitoba's tax expenditure accounts are separated into six sections: personal income tax, corporation income tax, health and education tax levy, retail sales tax, fuel tax and corporation capital tax. The estimates are calculated from tax assessment data provided by the Canada Revenue Agency and departmental data. The estimates provided are for the 2011/12 fiscal year and include measures announced in the 2012 Budget.

In the fall of 2011, the Public Sector Accounting Board (PSAB) issued guidelines on transfers made through the tax system that have an impact on revenue or expenditure, but no net fiscal impact. The guidelines took effect April 1, 2012. The PSAB guidelines stipulate that tax expenditures that provide a financial benefit through the tax system for a purpose other than the relief of taxes be shown as an expense.

The 2012 Budget reflects the following tax credits as expenditures and can be found in the Estimates of Expenditure in the departments of Agriculture, Food and Rural Initiatives, Education, and Finance. The 2011/12 Estimates have also been restated to conform with the new guidelines.

CREDITS ACCOUNTED FOR AS EXPENDITURE ITEMS	
	2011/12
	(Millions of dollars)
Education Property Tax Credit (including the Advance)	287.3
Farmland School Tax Rebate	35.5
Film and Video Production Tax Credit	15.0
Tuition Fee Income Tax Rebate Advance	7.9
School Tax Credit for Tenants and Homeowners (55+)	1.5
Book Publishing Tax Credit	0.4
Co-operative Development Tax Credit	0.2
Interactive Digital Media Tax Credit	0.1
Cultural Industries Printing Tax Credit	0.1
TOTAL	348.0

The PSAB guidelines also define tax concessions as financial benefits that provide tax relief for taxes previously paid or currently owing and directs that they be netted against the related tax revenue. The 2011/12 Estimates have been restated to conform with the new guideline. The following tax concessions have been netted against revenue:

- Personal Tax Credit
- Political Contribution Tax Credit (for individuals only)
- Community Enterprise Development Tax Credit
- Riparian Tax Credit

Revenue forecasts for 2011/12 have also been restated to reflect this new accounting standard.

Appendix 2: THE MANITOBA ADVANTAGE

Manitoba is a diversified economy where no single industry dominates the industrial base. Manitoba has been quick to adjust to the changing global market conditions. With emerging markets increasingly driving global growth, Manitoba has expanded its sales to Asia, the Middle East and Africa.

Diversity has provided Manitoba with balance, stability and measured growth over the long term. It has helped generate the best record for consistent growth in capital investment of all provinces, and supported the largest increase in population in 40 years.

Manitoba provides businesses and residents with a unique set of benefits that we call "The Manitoba Advantage:"

- a productive, well-educated and multilingual labour force that consistently generates among the lowest unemployment rate and the highest overall labour force participation rate in Canada;
- a favourable business cost environment, including competitive office and land costs, reasonable construction costs and affordable taxes;
- a supportive capital investment information network for new and expanding business includes Manitoba Business Gateways, Yes! Winnipeg and CentrePort Canada, among others;
- an extensive network of R&D facilities and communication infrastructure supporting innovation and productivity;
- a convenient mid-continent location with cost-effective transportation links and intermodal facilities providing shipping by road, rail, air and sea, enhanced by CentrePort Canada, the country's first foreign trade zone and inland port;
- a favourable cost of living, including among the lowest electricity costs in North America; reliable and accessible public services, including quality universal public health care and education;
- a dynamic cultural and artistic community with a strong background of caring, high level of charitable giving and volunteering; and an attractive natural environment with plenty of opportunities for recreation and relaxation which further enhance Manitobans' quality of life.

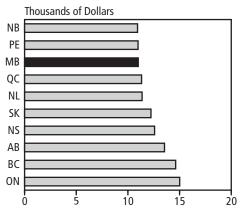

To show Manitoba's cost competitiveness in more detail, several analyses are provided. The interprovincial comparison of annual personal costs and taxes, net of credits and rebates, compares provinces' living costs and tax levels for a variety of family types (see p. C22) and graduate students (see p. C26).

Manitoba's Competitive Environment for Manufacturing, provides a detailed comparison of the taxes and costs faced by representative manufacturers in various Canadian and U.S. cities (see p. C30).

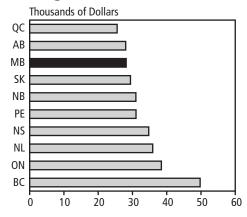

Since 1999, Manitoba's overall provincial rankings for personal costs and taxes have been among the best in Canada. For 2012, Manitoba's performance remains favourable. Interprovincial comparison of provincial taxes, utilities and housing costs for five representative family types continues to leave Manitoba ranking in the top three most affordable provinces in which to live and work.

2012 Comparison of Personal Costs and Taxes

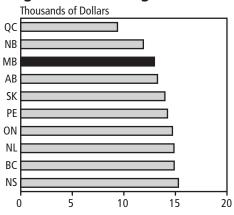

Single Person Earning \$30,000

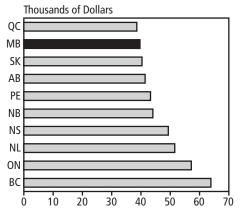

Two-Earner Family of Four Earning \$60,000

Single Parent Earning \$30,000

Two-Earner Family of Five Earning \$75,000

NOTES

Provincial taxes, credits and premiums are based on information available prior to April 1, 2012, (except for Manitoba, which includes Budget 2012 changes) for the following major urban centres in each province: Vancouver, Calgary, Saskatoon, Winnipeg, Toronto, Montréal, Saint John, Halifax, Charlottetown and St. John's.

Auto insurance coverage includes \$2 million Third Party Liability, a \$500 All Perils Deductible, accident benefits and \$2 million Standard Policy Form #44 family protection coverage for those jurisdictions without no-fault injury coverage, and La Societé de l'Assurance Automobile du Québec injury protection in Montréal. Rates were provided by the Insurance Corporation of British Columbia for British Columbia, SGI Canada for Saskatchewan, and Manitoba Public Insurance (MPI) for Manitoba. Rates for other cities are the average of the quotes from 10 private insurers providing coverage in those provinces. Discounts for second or multiple vehicles, where available, are not included in the auto insurance calculations. Rebates issued by MPI or other insurers are also excluded. Auto insurance for the 2010 Dodge Grand Caravan SE and the 2003 Chevrolet Malibu are used in these examples, two of the more common vehicles driven in Manitoba.

Child-care costs are based on annual parent fees paid, less subsidies, for preschool aged children, typically over two years of age and under six years of age, for 260 days or 12 months per year. Manitoba and Quebec are the only provinces with regulated maximum parent fees. Fees for other provinces are those obtained from provincial offices, online and/or in a survey conducted in the first quarter of 2011.

Gasoline Tax is based on the annual consumption of 3,000 litres. The Gasoline Tax includes all provincial levies on gas, including carbon tax and sales tax where applicable.

Health premiums are annual premiums for hospital insurance and medical services in provinces which levy them. Quebec's Prescription Drug Plan, Parental Insurance Plan and health contribution are included.

Mortgage costs are based on average home prices for a detached bungalow for the family with \$60,000 of income and for the graduate with \$50,000 of income, and on an executive detached two-storey for a family with \$75,000 of income, from the "Royal LePage Fourth Quarter 2011 Survey of Canadian House Prices," with one-half of the home price being financed over 25 years at a one-year closed mortgage rate of 3.48%.

Net child benefits represent provincial programs comparable to the Canada Child Tax Benefit for families with children. Provincial child benefit measures are available in British Columbia (Family Bonus and the Earned Income Benefit), Alberta (Family Employment Tax Credit), Manitoba (Child Benefit), Ontario (Trillium Benefit), Quebec (Child Assistance Payments), New Brunswick (Child Tax Benefit and the Working Income Supplement), Nova Scotia (Child Benefit), and Newfoundland and Labrador (Child Benefit).

Property taxes for the family with \$60,000 and the graduate with \$50,000 of income are based on the estimated taxes for a sample detached bungalow from the City of Edmonton "2010 Residential Property Taxes and Utility Charges Survey" with the exception of Charlottetown whose property tax estimate is based on the Saskatchewan 2012 Budget Paper "2012 Intercity Comparison of Taxes, Utilities and Housing." Property taxes for the detached bungalow have been proportionally adjusted for a family with \$75,000 of income to reflect the taxes paid for an executive detached two storey.

Provincial income tax is calculated for a single renter with \$30,000 earned income, a single parent with one preschool child who rents and has \$30,000 in earned income, and the two family profiles with \$60,000 and \$75,000 of earned income, respectively. These incomes are before receipt of the Universal Child Care Benefit (UCCB), but the UCCB is used in the calculation of income tax. For the single parent, UCCB is treated as taxable income of the dependant child. Family profiles include two income earners (one spouse earns 60% of the family income while the other spouse earns 40%) and two preschool

children; or three preschool children. Personal non-refundable credits used include the CPP/QPP and EI contribution credits. For the single parent, child-care costs less subsidies for each province have been deducted from income. For twoearner families, eligible child-care costs have been deducted from the income of the spouse with the lower income. Gross Quebec personal income tax has been reduced by the 16.5% abatement for federal income tax. Refundable sales tax credits and provincial tax reductions and rebates have been deducted from income tax payable. Property tax credits for renters are included in income tax, but property tax credits for homeowners are shown separately.

Rent is from Canada Mortgage and Housing Corporation's Rental Market Survey, October 2011, and is based on the average one-bedroom apartment rent for each urban centre.

Provincial sales tax is based upon an average expenditure basket at the total income levels from the "2009 Survey of Household Spending" (Statistics Canada), inflated to 2012 values using each province's Consumer Price Index.

Transit fares are based on adult monthly pass rates in effect in January 2012. The impact of the federal non-refundable public transit tax credit has reduced the cost of transit fees shown for the single individual and single parent with one child examples.

Utilities are based on the Saskatchewan 2012 Budget Paper "2012 Intercity Comparison of Taxes, Utilities and Housing."

- Home heating charges are based on an annual consumption level of 2,800 cubic metres of natural gas for a detached bungalow for the family with \$60,000 of income and the graduate with \$50,000 of income. Annual consumption for the detached bungalow has been proportionally adjusted for the executive detached two storey. For the Atlantic provinces, the figures represent the BTU equivalent consumption of fuel oil.
- **Electricity charges** are based on the annual consumption of 8,100 kWh for a detached bungalow for the family with \$60,000 of income and the graduate with \$50,000 of income and 13,500 kWh for the family at \$75,000. Annual consumption of 4,500 kWh is used for the single person and single-parent renters. Rates do not include municipal taxes.

APPENDIX 3: MANITOBA'S COMPETITIVE ENVIRONMENT FOR MANUFACTURING

Competitive operating costs and taxes have made Manitoba one of the least expensive provinces in Canada to do business. Among representative North American cities, both smaller and larger manufacturers in Brandon and Winnipeg rank at or near the best on start-up costs, net income, overall taxes and return on investment. Manitoba's competitive business environment continues to position Manitoba as an ideal manufacturing location due to:

- its central location and excellent transportation links to the rest of North America, including CentrePort Canada
- · low industrial and commercial land costs
- · electricity costs which are among the lowest in the world
- a skilled, well-educated and affordable work force
- one of the best R&D tax credit regimes
- low taxes on capital investments.

Manitoba Finance's competitiveness model compares the tax structure and cost environment for representative smaller and larger manufacturing firms relative to several other North American cities.

The model simulates start-up, operating, financial and taxation costs over a period of 20 years. It incorporates future unconditional changes in taxes that have been announced by the federal, provincial, state or local governments. The representative firms' profiles have been updated using the most recent data available from Statistics Canada, local economic development boards and other public sources.

Payroll-related Levies

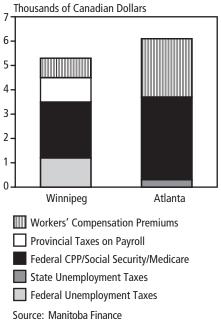

U.S. employers pay federal and state unemployment taxes, social security tax and medicare tax and are also required to provide workers' compensation coverage. Canadian employers do not pay provincial unemployment or federal medicare taxes, though some provinces have taxes on payroll. For example, at the same wage level, a firm in Atlanta will have higher payroll-related taxes and levies than in Winnipeg.

Interjurisdictional Competitiveness

The following indicators are used to assess cost and tax competitiveness for both a smaller and a larger manufacturing firm:

- net cost of investment, or start-up costs (including applicable taxes)
- pre-tax net income
- effective tax rates
- internal rates of return.

Payroll-Related Taxes and Levies per Employee, Larger Manufacturing Firm Winnipeg and Atlanta, 2012

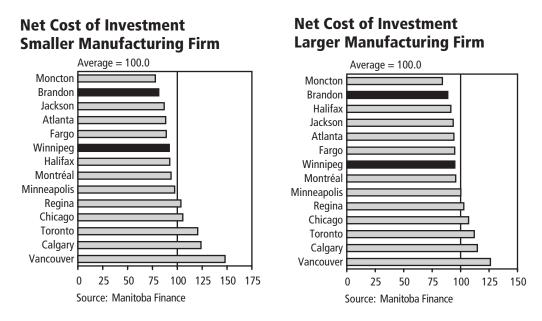

The model uses actual costs for each city and calculates net revenue and cash flow, including start-up costs, based on the operating costs in each location.¹ The results for each city are compared to the overall average of all cities (100.0) for each of the indicators and presented in the charts that follow.

Net Cost of Investment

The costs of starting a manufacturing plant (land, buildings, and machinery and equipment) in Manitoba cities are among the lowest of all cities. Investment tax credits on capital asset purchases reduce the net cost of investment. Start-up costs in larger cities tend to be higher due to the cost of land and construction labour wages and salaries.

Pre-Tax Net Income

Pre-tax net income compares Manitoba's business cost competitiveness to other jurisdictions. It is calculated by deducting production material costs and location-specific costs from fixed annual sales figures. Annual sales are uniform for all locations and are ramped up through the first four years of operation then fixed across the cities at \$4 million for the smaller firm and \$45 million for the larger firm for years five to twenty. Annual production material costs are equal to 46% of sales in a given year.

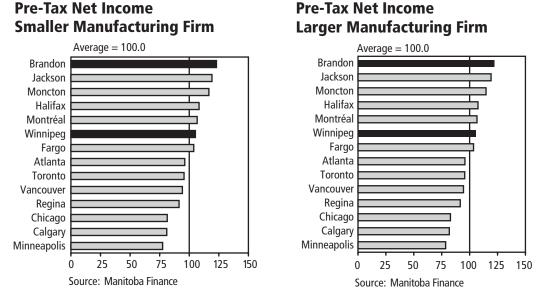

The following location-specific costs are also deducted from annual sales:

- average manufacturing wages
- local utility costs for electricity
- interest charges on debt used to finance construction of the manufacturing plants

¹ For comparison purposes, U.S. data is converted to Canadian dollars at an exchange rate of C\$0.9919 (March 16, 2012 rate).

- depreciation of capital assets: buildings costs (which vary by city based on local construction wages) and machinery and equipment (which are assumed to be the same across all cities)
- employer-paid health premiums.

Brandon yields the highest pre-tax net income for both the smaller and larger manufacturing firms, while Winnipeg has the sixth-highest pre-tax net income for both model firms, which is still above the overall average for all cities.

Effective Tax Rates

Effective tax rates are generated by computing gross taxes as a proportion of pre-tax net income over the 20-year period. The following annual taxes are taken into account:

- corporation income taxes
- local property and business taxes
- corporation capital and U.S. franchise taxes
- taxes on payroll
- workers' compensation premiums
- statutory pension and unemployment insurance premiums.

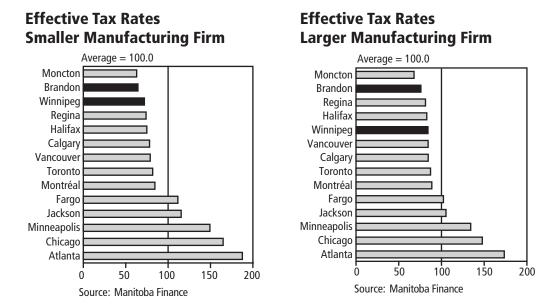

For U.S. firms, employer-paid health premiums are also included.

The following tax expenditures that benefit the manufacturing sector are also taken into account:

- investment tax credits
- tax holidays
- accelerated capital cost allowances
- preferential tax rates.

Not included are enterprise zones, grants, and other forms of governmental and third-party financial assistance programs that are subject to an approval process.

For both the smaller and larger manufacturing firms, both Winnipeg's and Brandon's effective tax rates are well below the overall average (100.0).

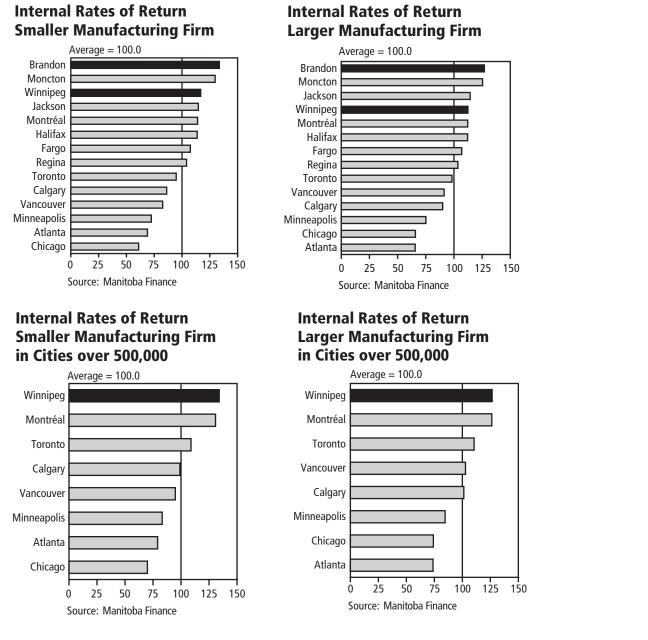

Overall Competitiveness

Overall competitiveness is compared by calculating internal rates of return, which are commonly used by business in making investment and location decisions. A higher internal rate of return indicates a city is more competitive than others. Internal rates of return for each city are calculated using start-up costs and cash flow over a 20-year period, specific to a smaller and a larger manufacturing firm, then discounted using applicable Canadian and U.S. commercial interest rates. The following charts illustrate the combined impact of taxes and costs on the internal rates of return for the representative smaller and larger manufacturing corporations in the selected jurisdictions.

The internal rates of return for both Winnipeg and Brandon are above the overall average of the cities included in the study. Brandon has the highest internal rate of return. Winnipeg has the third-highest internal rate of return for the smaller manufacturing firm and the fourth-highest internal rate of return for the larger manufacturing firm.

Among cities with populations over 500,000, Winnipeg has the highest internal rate of return for both smaller and larger manufacturing firms.

CONCLUSION

Manitoba continues to maintain a highly competitive overall business cost and tax environment for both smaller and larger firms engaged in manufacturing and processing.

Manitoba Finance's findings are consistent with the recently published "Competitive Alternatives 2012: KPMG's Guide to International Business Location Costs," which analyzes business costs and other competitiveness factors of more than 110 cities in 14 countries. In the KPMG study, Winnipeg once again ranked as the most competitive among 25 larger North American mid-western cities. When smaller centres are included, Brandon ranked third and Winnipeg's rank moves to fifth most competitive of 32 cities. Manitoba's most cost-effective industries were in the R&D, digital and corporate services sectors (biotechnology, clinical trials, electronic product testing, digital entertainment, software design, professional services and support services).
