

Manitoba Public School Lead in Drinking Water Testing and Mitigation Results

As of May 1, 2023

In 2019, Health Canada's released a new national guideline for lead in drinking water. The guideline lowered the allowable level of lead in drinking water and recommended testing drinking water at schools taps and water fountains. Manitoba adopted the guideline in 2020, and established a grant to support schools and child care centres to test drinking water for lead, and to take action to lower lead levels should test results be higher than the national guideline. The following table presents the data from the school drinking water testing program. For help with interpreting the table, please refer to the list below:

Is testing complete?

- Complete – testing is complete, results have been received
- In-progress – samples were collected, waiting for test results
- Not-started – not yet tested

Are results elevated?

- No – if all samples collected from drinking water taps are below the guideline for lead (mitigation is not required)
- Yes - if any samples test above the lead guideline, results are elevated and mitigation is required
- Dash – not yet tested

Mitigation Status*

- Not Required –test results are not elevated and mitigation is not required
- Complete – mitigation work is complete (does not capture if retesting to ensure leads levels occurred)
- In-progress – work is on-going
- Not started – work has not begun
- Not reported - school has not updated their status
- Dash – not yet tested

*Mitigation status refers to the work done to permanently address an increased lead in drinking water problem (e.g., replacing pipes, installing water bottle fill stations). This category does not capture interim corrective actions (e.g., removing handles, posting "do not drink signs", providing an alternative source of drinking water). Public Health recommends corrective action to prevent exposure to increased lead in drinking water until a permanent solution is available and confirmed to reliably reduce lead levels below the Canadian Drinking Water guideline.
