Pesticide Tank Mix Combinations

The tank mixes given on the product pages in the guide are limited to those listed on that product's label. The following chart is designed to allow the user to find all tank mix options available for a product.

To find mixes recommended on the product label, find the product of interest on the list to the left. Hits along that row correspond to tank mixes recommended by that product.

To find additional mixes that may be recommended by other products, find the product of interest in the top listing. Hits in that column will either be common recommendations or exclusive recommendations.
