2009 Manitoba Grasshopper Monitoring Program

Complete survey and mail or E-mail this form by September 30, 2009 to:
John Gavloski, Manitoba Agriculture, Food and Rural Initiatives, Crops Knowledge Centre, Box 1149, Carman, MB, R0G 0J0. E-mail: John.Gavloski@gov.mb.ca

Record the average number of grasshoppers per square meter.

Rural Municipality _____

Site location				Vegetation at location monitored	Number of grasshoppers /m^2
Date surveyed	Qtr. & Section	Town-ship	Range	1=roadside (indicate predominant plant types if known) 2=annual crop (indicate crop) 3=pasture (indicate predominant plant types if known) 4=perennial forage (indicate type)	

* Samples should be taken either on roadsides **or** within the field, wherever grasshopper populations appear to be highest.

Observations:

(For example, note the predominance of a particular species at a given location, locations with diseased grasshoppers, etc.)
