Pre-registration is required by September 22, 2010.

Manitoba Women's Institute is delivering a series of learning sessions for board members with the goal of improving conversation, learning, & board governance. The information gathered from the first session will help in developing future customized workshops that address the specific skills needed.

- What leadership skills do you need on your board to help create a desired future?
- What role do you play in making sure all board members are heard?
- How do you create the setting for people to feel comfortable in giving their ideas?
- How do you bring people together when difficult decisions need to be made?

This session will begin to model for boards ways to work with others in a positive and effective manner. We welcome as many of your board members that are able to attend so as a board you can plan your future together.
