Signed: _____

Date: _____

Location of Workshop Attending: _____

Please return to:

Please note that these forms are required to be returned ten (10) working days prior to the Workshop you are planning to attend to the office noted above. Thank you.

FARMSTEAD SITES

Farmstead sites are places where there are water sources AND potential of contamination or permanent structures. Water sources can be wells, dugouts, streams, lakes, creeks and abandoned or uncapped wells. Sources of contamination can be any of the structures on your farm, such as homes, equipment sheds, barns, livestock shelters and yards, manure storage, compost sites, and pesticide, petroleum and fertilizer storage facilities. If the farmstead site is a river lot, wood lot or settlement, please note separately in space provided. Include all farmstead sites under your direct management, either owned or rented.

*RM information will assist in developing appropriate supports maps for your land.

FARMSTEAD SITES – ¼ SECTION							
	Land Parcel No.	Quarter	Section	Township	Range	Meridian	*Rural Municipality
<i>Example</i>		<i>SW</i>	<i>16</i>	<i>40</i>	<i>25</i>	<i>W</i>	<i>Elton</i>
