

# Your growing solution to greenhouse gas emissions

---

If you're a landowner, who is interested in planting trees on your property, you should learn more about *The Trees for Tomorrow Program*. As part of the Manitoba government's action plan to reduce greenhouse gas emissions by 2012, the *Trees for Tomorrow* program is committed to planting one million trees a year in Manitoba over the next five years.

## What's in it for you?

Besides helping reduce greenhouse gas emissions, planting trees on your property will improve air quality by filtering pollutants, provide food and shelter for wildlife, store carbon dioxide, recycle moisture into the atmosphere and prevent soil erosion.

## You provide the land. We'll help with the rest.

If you're a landowner who is interested in planting trees on your property, the *Trees for Tomorrow* program may be for you.

Depending on your parcel of land, and on the plan we develop with you, *Trees for Tomorrow* could provide you with:

- a free program, including a site inspection,
- the development of a site plan,
- free seedlings,
- site preparation,
- overseeing the planting,
- tending the young trees, and...
- follow-up survival assessments.

## Find out more

To learn more about how you can become part of the *Trees for Tomorrow* program, please visit the Manitoba Forestry Association website at [www.mbforestryassoc.ca](http://www.mbforestryassoc.ca) or call 204-453-3182 or visit Manitoba Conservation's website at [www.gov.mb.ca/conservation/forestry/index.html](http://www.gov.mb.ca/conservation/forestry/index.html) or call 204-945-7989 in Winnipeg or Toll-free at 1-800-214-6497.
