

1. What **problems** might this proposal cause, that could **not** be remedied or prevented?

2. Do the **benefits** of this proposal outweigh the potential problems (for which there are no remedies)?

3. What effect would these problems have on your group or in your area of speciality, with regard to the **environment**?

4. What effect would these problems create for **people** living in this area?

5. Are there any other **recommendations/suggestions** that you would make to the EBM Team at this time? Explain.

6. Based on the information that you or your group has compiled, will you vote that the proposal be approved, or not?

Yes

No
