SAFETY AND HEALTH OFFICER

PREAMBLE

This series includes positions that carry out inspections and/or investigations for the purpose of regulating, controlling and ensuring compliance with the requirements of The Workplace Safety and Health Act, the regulations pursuant to the Act and related legislation. In addition to performing inspections, there is a requirement to carry out prescribed routine industrial hygiene surveys.

The work is performed within established standards and clearly defined procedures.

Exclusions

This series does not include positions in the occupational health field with responsibility for developing and implementing scientific surveys, research programs, or establishing standards and procedures relating to industrial hygiene, or to positions responsible for managing industrial hygiene programs. Also excluded from this series are positions with primary responsibility for the development and delivery of educational and training courses and materials in the occupational safety and health fields, positions involved in co-ordinating workplace safety and health programs in a government department, or positions where the primary duties and responsibilities are included in the definition of any other category.
SAFETY AND HEALTH OFFICER 1

GENERAL

This is the training and development level. Employees will receive on-the-job training in addition to the prescribed in-house formal training program. Employees may be promoted to the full working level after completion of all phases of the training program and satisfactory work performance reviews. Under close supervision, employees will assist in carrying out inspections/investigations and industrial hygiene surveys of both the industrial and construction workplaces relating to the legislation specified in the series preamble.

This level can also be used as a bridge position for staff development purposes.

Employees will normally advance to the full working level within a two-year period.
