2021/22 De	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
	<i>N</i> ajor	Patient developed a stage 4 pressure injury while in care.
2021/22 De	Death	Residents developed a healthcare acquired infection associated with a serious outcome.
	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
	Death	Patient developed a healthcare acquired infection associated with a serious outcome.
	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
2021/22 M	∕lajor	A resident experienced a change in their medical condition. The opportunity for earlier
		recognition and intervention was not realized.
	Death	Residents developed a healthcare acquired infection associated with a serious outcome.
2021/22 De	Death	The opportunity to activate all client follow up protocols was not realized and led to a delay in
		recognition and response to their medical condition.
2021/22 De	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
2021/22 De	Death	Resident developed a healthcare acquired infection associated with a serious outcome.
2021/22 M	/lajor	A patient experienced a change in health status requiring medical intervention after receiving a
		prescribed medication.
2021/22 M	/lajor	A patient experienced skin tissue breakdown requiring increased care and intervention. Early
	-	opportunities to provide intervention were not consistently realized.
2021/22 M	/lajor	Delays in recognition and response to clinical deterioration led to serious harm and the need for a
	•	higher level of care.
2021/22 M	/lajor	A patient experienced gaps in treatment which contributed to a worsening medical condition.
		A patient undergoing a surgical procedure experienced an operative complication requiring
	Лаjor	

Fiscal Year Occurred	Degree of Injury	Description
2021/22	Major	Opportunities for reassessment and treatment, and acquisition of appropriate transport resources
	•	prior to patient transfer were not realized. This resulted in a deterioration in the patient's medical
		condition during transport that required life-saving treatment.
2021/22	Major	Stage 3 pressure injury developed while in care.
2021/22	Unknown	Residents developed a healthcare acquired infection associated with a serious outcome.
2021/22	Major	A patient experienced an acute change in their condition that was recognized by care providers,
		however a delay in investigation and treatment occurred resulting in functional impairment.
2021/22	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early
		opportunities to provide intervention were not consistently realized.
2021/22	Major	Patients developed a healthcare acquired infection associated with a serious outcome.
2021/22	Major	Patients developed a healthcare acquired infection associated with a serious outcome.
2021/22	Death	Delay in treatment resulting in patient death.
2021/22	Major	A patient experienced a delay in intervention for an acute medical condition.
2021/22	Major	A patient experienced a procedural complication associated with a serious outcome requiring
		emergent intervention.
2021/22	Major	A patient presented multiple times to an Emergency Department. The patient's condition
		continued to decline requiring hospitalization and surgery.
