

Distribution of Blacklegged Tick Risk Areas in Manitoba

LEGEND

- Blacklegged Tick Risk Area
- Passive Surveillance Submission Site
- Health Region
- Major Highways

Projection: UTM Zone 14 NAD83
 Basemap data: Manitoba Land Initiative
 Created: March 15, 2018

* Although the risk of encountering a blacklegged tick is greater in these risk areas, it should be cautioned that 1) the distribution of blacklegged ticks in these risk areas is not uniform, and 2) blacklegged ticks can also be found outside these risk areas.

For more information visit
www.gov.mb.ca/health/publichealth/cdc/tickborne/index.html

Tick surveillance is a collaborative project involving the Public Health Agency of Canada, the University of Manitoba and MHSAL.
