Tips for Handling Shelf-Stable Items

Store shelf-stable products in a cool, dry place.

Do not store canned goods in any location such as a garage or cottage where the temperature may drop below 32°F (0°C) or go above 85°F (29°C).

Place newly purchased items behind older ones, so each item can be used within its recommended shelf life.

Do not use cans or jars with dents, cracks or bulging lids.

Read the label carefully. If refrigeration is necessary for safety, the label must say “Keep Refrigerated.” If the item was purchased off the shelf, the product will probably not require refrigeration until opened.

Guidelines for Choosing Snacks for Preschoolers

- Serve colourful bite size portions.
