Provincial Water Advisories

- Public Water Systems -

Reported as at 12 Dec 2025

2400 Water Advisories issued in public water systems in Manitoba have been satisfactorily addressed and lifted since January 01, 2000

i) Time Frame to Resolve

Short-term

Water systems listed as short-term are taking immediate steps to address the advisory. The majority of advisories in this category are issued due to minor operational problems that can be easily addressed in a timely manner. Also under this category are water systems that have been under advisory for a longer period of time and are in the process of upgrading their water supply to address the advisory.

Medium-term

Water systems listed as medium-term are taking steps to address the advisory within a two to three year period. The majority of advisories in this category are issued due to minor treatment problems that require the installation of basic treatment equipment.

Long-term

Water systems listed as long-term require significant financial capital funding to address major operational and treatment problems. The majority of the advisories in this category were issued due to a lack of critical treatment processes.

DISCLAIMER: While every effort is being made to maintain this advisory list updated, conditions may arise at times that may prevent recent information from being displayed in a timely manner. Users of this list, if concerned, are advised to contact the local Drinking Water Officer, or the Regional Health Authority for more detailed information.
