## Manitoba Clean Environment Commission Notice of Public Hearings

### City of Winnipeg Wastewater Collection and Treatment Systems

The Manitoba Clean Environment Commission (CEC) has been requested by the Minister of Conservation to convene a public hearing to review and receive public comments respecting the City of Winnipeg's wastewater collection and treatment systems.

#### Background:

In June of 1992 the CEC issued a report on the "Application of Water Quality Objectives for the Watershed Classification of the Red and Assiniboine Rivers and Tributaries Within and Downstream of the City of Winnipeg". This report contained a number of recommendations that related to the City's wastewater collection and treatment systems. The Manitoba Government accepted those recommendations. Subsequently, the City in consultation with Manitoba Conservation and the scientific community, has implemented upgrades, undertaken studies and prepared plans to improve its wastewater collection and treatment systems.

The CEC has now been requested to review the current status of the City's wastewater collection and treatment systems and to consider plans proposed by the City for its future upgrading and continued operation. At the conclusion of this review, the CEC will provide advice and recommendations to the Government of Manitoba according to the following terms:

#### Scope Of The Review

- The reliability of the City's systems, especially the backup capability of the systems to prevent a discharge of inadequately treated sewage to the rivers during malfunctions.
- The appropriate ammonia, nutrient, combined sewer overflow and microbiological limits on effluent from the City's systems necessary to protect the aquatic environment and recreational activities, including in Lake Winnipeg.
- The current and planned effectiveness of the City's systems in treating wastewater to achieve the discharge limits.
- The adequacy of the City's plans and schedule for upgrading its systems.
- The adequacy of processes being followed in reviewing those plans and schedules.

#### Public Hearing

##### \*Winnipeg

Date: **January 20, 21 and, (if necessary) 22, 2003**  
Location: Winnipeg Convention Centre  
375 York Avenue, Winnipeg
