Advice for obtaining a Certificate of Exemption to retain a sewage ejector system for subdivision of land:

In Manitoba, owners of land on which a sewage ejector system is located must decommission the ejector before the land is transferred or subdivided.

However, land owners may apply to Manitoba Conservation for a certificate of exemption to retain a sewage ejector system up to one year before the transfer or subdivision of the land on which the sewage ejector is located. The land owner is entitled to be issued a certificate of exemption providing the location of the existing sewage ejector system is in compliance with all regulatory requirements including those set out in Schedule E of the *Onsite Wastewater Management Systems Regulation*.

When applying for an exemption prior to subdivision, you must attach a copy of the conditional approval letter for the proposed subdivision from the Subdivision Approving Authority. The conditional approval letter will ensure that your proposed subdivision is consistent with the municipality's Development Plan and the Subdivision Regulation under *The Planning Act* and will require that the applicant meets the requirements of the *Onsite Wastewater Management Systems Regulation*.

Manitoba Local Government can provide you with information and assistance on planning your proposed subdivision. Contact your local office of the Community and Regional Planning Branch at:
