

# APPLICATION FOR A FLOW LINE LICENCE

In accordance with Subsection 146(1,a) of The Oil and Gas Act, no one shall construct a flow line without the **written approval** of an inspector. This application must be submitted to the District Office prior to commencing construction of a flow line, and must include all pertinent information as listed in Subsection 93(1) of the Drilling and Production Regulation. **For assistance in completing this form please contact the Virden office at 204-748-4260**

In compliance with Drilling and Production Regulation 93(1), application is made for a flow line licence by:

\_\_\_\_\_ With regard to this application the contact person is: \_\_\_\_\_  
 (company name) (name) (telephone#)

| Flow Line Lic # | From surface location: | From: Lic # Well/Bat | Type: Grp/Tst/Inj/FL | To surface location: | To: Lic# Well/Bat | Pipe Code (Dept. Use) | Nominal Pipe ID (mm) | Pipe Material | Pipe Specification (series or grade)* | Length (m) | AOP** (KPa) |
|-----------------|------------------------|----------------------|----------------------|----------------------|-------------------|-----------------------|----------------------|---------------|---------------------------------------|------------|-------------|
|                 |                        |                      |                      |                      |                   |                       |                      |               |                                       |            |             |
|                 |                        |                      |                      |                      |                   |                       |                      |               |                                       |            |             |
|                 |                        |                      |                      |                      |                   |                       |                      |               |                                       |            |             |
|                 |                        |                      |                      |                      |                   |                       |                      |               |                                       |            |             |
|                 |                        |                      |                      |                      |                   |                       |                      |               |                                       |            |             |

\*'Grade' is required for steel pipe; 'Series' for non-ferrous line. \*\*AOP: Anticipated Operating Pressure. The maximum pressure the line will be subjected to under normal operations, including pigging.

**Please indicate if the following required submissions are attached:**

Legal survey (1:5000): Yes  N/A  Complete manufacturer's pipe specification: Yes  Spill mitigation details: Yes   
 Detailed tie-in drawings Yes  A scaled plan view & cross section of all crossings: Yes  N/A  Corrosion mitigation details: Yes  N/A

Please list all sensitive areas and special circumstances (domestic water sources, water covered areas or crossings, species of special concern, native prairie, etc.): \_\_\_\_\_

If sensitive areas and/or special circumstances are identified a pre-site assessment is required and must be attached.

**Surface rights obtained:** Yes  **Flow line buried 1.5 m or** \_\_\_\_\_ **Construction Contractor:** \_\_\_\_\_

**An excavation permit must be obtained from the district office prior to any worker entering a trench. F/L Excavation Permit No.:** \_\_\_\_\_

**Approval to construct the above listed flow lines: (License will be cancelled 1 year from approval to construct date if pressure test is not witnessed and chart is not submitted.)**

\_\_\_\_\_ (date) \_\_\_\_\_ (signature of applicant) \_\_\_\_\_ (date) \_\_\_\_\_ (signature of inspector)

**To the Operator:** Construction may proceed upon receipt of signed approval.
