FORECAST PEAK LEVELS FOR LAKES--- SPRING OF 2008
 March 20, 2008 Forecast

Table 3

	(All Levels are Wind Eliminated and in Feet Above Sea Level)							
	RECENT LEVEL	SUMMER TARGET LEVEL	FORECASTED SPRING CREST			Previous Peak Levels (feet)		
			# Dry Weather	Average Weather	# Wet Weather	2005	2006	2007
Big Whiteshell	1017.2	1019.0	1018.0	1018.8	1019.5	1020.3	1018.8	1021.6
Brereton Lake	1035.8	1036.8	1036.5	1037.1	1038.1	1037.6	1037.4	1037.9
Cedar Lake	832.4	831.7-841.8		^836.6		841.9	840.9	841.4
Clearwater Lake	853.3	852.0-853.0	854.1	854.4	854.8	854.2	854.4	854.5
Dauphin Lake	854.0	854.8	854.2	854.5	855.1	857.2	855.7	855.9
Falcon Lake	1065.2	1065.2	1065.9	1066.4	1066.9	1066.5	1065.7	1066.9
Jessica Lake	1016.7	1017.5	1017.3	1017.8	1018.6	1017.9	1018.4	1018.7
Lake Winnipeg	714.1	711.0-715.0	714.3	714.6	715.0	716.6	714.9	715.0
Lake Manitoba	811.9	810.5-812.5	811.8	812.0	812.4	813.4	812.6	812.4
Lake Winnipegosis	832.1	829.2	832.0	832.2	832.4	831.7	833.3	834.1
Lake St. Martin	801.35	799.0-800.0	*799.5	*799.8	*800.2	801.6	801.2	801.2
Lake Of The Woods	1058.4	1060.0	1058.6	1058.9	1059.4	1061.4	1059.1	1059.9
Lake Of The Prairies	1394.1	1403.5	1398.7	1403.0	1406.4	1406.2	1412.4	1410.8
Nutimik Lake	903.1	901.5	903.0	904.0	905.5	907.4	903.4	903.6
Oak Lake	1408.9	1409.8	1409.0	1409.2	1409.6	1410.4	1409.8	1410.2
Pelican Lake	1350.6	1351.2	1350.7	1350.9	1351.3	1352.5	1352.8	1351.6
Red Deer Lake	859.5	859.5	862.0	864.0	866.0		868.0	865.5
Reindeer Lake	1103.5	1098-1104.6		& 1104.5		1104.6	1104.4	1103.8
Rock Lake	1329.5	1329.0	1331.0	1333.0	1335.0	1338.5	1338.2	1333.1
Southern Indian Lake	845.4	843.0-847.5		^845.7		847.7	847.5	847.4
Split Lake	548.9	547.5		^549.2		555.2	552.6	552.2
West Hawk Lake	1091.3	1092.0	1091.9	1092.5	1093.0	1092.7	1091.9	1092.8
North Shoal Lake	855.9	854.5	856.1	856.4	856.8	857.3	857.2	856.3

Notes: Spring levels may be temporarily higher than predicted if strong winds occur.
 Predicted levels include anticipated operation of control works such as dams and diversions.
 * Level for late May, 2008. Level above 801 feet until late April due to ice in Dauphin River.
 ^ Manitoba Hydro predicted level for end of May. & Sask Water A. forecast for late July, 2008.
 # Dry and Wet weather refer to lower decile and upper decile precipitation respectively.
