

Esthetician Level 1

Unit: E1 Learning About Work

Level: One

Duration: 10 hours

Theory: 10 hours Practical: 0 hours

Overview:

A sign that an apprentice has become competent in a task or technique is a demonstrated ability to share this knowledge. Worksite skills-exchange has long been fundamental to trade-learning. Even trade veterans rely on peers to refine their knowledge and skill. The opportunity to benefit from this process, however, is shaped by complex factors that include worksite politics and job deadlines. As adult trade-learners, apprentices at all levels of training must use their observational, listening and interpersonal skills to benefit from the journeyperson's knowledge and experience. This requires understanding the trade's dynamics, as well as the roles and responsibilities which determine work-life.

This unit profiles the trade's structure and scope as determined by The Apprenticeship and Certification Act, Apprenticeship and Certification Board, Sector Committees, and Industry Working Groups using the occupational standards from which the technical training is derived. This unit also includes short- and long-term career progression and social competencies. This includes information about major areas of working knowledge, activities and interactions at work, and expansive and restrictive workplaces, stressing their application to apprenticeship on-the-job training.

A sound grasp of the roles, workplace relationships, and possibilities introduced in this unit are part of 'learning to learn' in Manitoba's apprenticeship system. Senior apprentices are later offered information about the transfer of knowledge and skills in this system. Please refer to unit E8 Journeyperson Trainer which explores the central and time-honored foundation of trades journeywork.

Note: No percentage-weightings for test purposes are prescribed for this unit's objectives. Instead, a "Pass/Fail" grade will be recorded for the unit in its entirety.

Objectives and Content:

Percent of Unit Mark (%)

1. Describe the structure and scope of the Esthetician trade.

n/a

- a. The Apprenticeship and Certification Act
 - Apprenticeship and Certification Board
 - Sector Committees and Industry Working Groups (IWG)
 - · General regulation, and specific trade regulations/by-laws
 - Policies regarding attendance, evaluation procedures, conduct, and progression requirements (Apprenticeship Manitoba, training provider)
- b. Uses of the Provincial Occupational Standard (POS)
 - Apprenticeship Manitoba technical training standards
 - On-the-job report of hours
 - Examinations (unit tests, final certification examinations)
- c. Opportunities and future career options

- Generalists and specialists. The move toward specialization is well known to modern tradespeople. Some prefer to specialize and others want to do it all. Supervisory positions require a broad scope.
- Lead hands and other immediate supervisors. Apprentices need to know how to become a lead-hand as much as they need to know the benefits and pitfalls of leadership between management, journeypersons, tradespersons and other workers.
- Geographic mobility. What does it mean to a tradesperson to have to travel to find work? Are there more opportunities if they do? What are they? What are the drawbacks to being away from home for several weeks at a time?
- Job hierarchies and innovations. What trade specific special training opportunities are available in the trade? Is there travel involved? How do these opportunities affect work assignments and career progression?

2. Describe two levels of workplace competency.

n/a

- a. Job competencies related to workplace culture
 - Knowledge of workplace equipment and materials
 - · Skills and techniques
- b. Social competencies related to workplace culture
 - Language of work
 - · Workplace belief systems
 - Rules and meanings
 - · Equity, diversity and inclusion in the workplace

3. Describe accommodation for apprentices with accessibility requirements.

n/a

- a. Awareness of the Accessibility for Manitobans Act
 - · Customer service accessibility standard
 - · Employment accessibility standard
 - · Information and communications accessibility standard
 - Built environment
 - Transportation
- b. Technical training
 - Requirements
 - · Roles and responsibilities
 - · Services and information required by persons with accessibility requirements
- c. On-the-job
 - Requirements
 - · Roles and responsibilities
 - · Services and information required by persons with accessibility requirements

Unit: E2 Trade Safety Awareness

Level: One

Duration: 15 hours

Theory: 15 Hours Practical: 0 Hours

Overview:

Safe working conditions, injury prevention, and the preservation of health are of primary importance to industry in Canada. These responsibilities are shared and require the joint efforts of government, employers, supervisors, and workers. It is imperative to be familiar and apply the Manitoba Workplace Safety and Health Act and Regulations. Safety education is an integral part of apprenticeship training both in school and on-the-job. This unit is an overview of occupational safety and health best practices in Manitoba and covers Personal Protective Equipment, the Workplace Hazardous Materials Information System, and Safe Work Procedures. The unit also describes injury prevention and response. Finally, the unit reinforces these best practices by navigating the SAFE Work Manitoba website through each objective to apply Manitoba's most current safety and health standards. Additional trade safety awareness related resources are located on the Apprenticeship Manitoba website link below. Trade specific hazards and safe work practices are supplemented and delivered in-context within technical training units.

- SAFE Work Manitoba website: https://www.safemanitoba.com/
- Safety resources: https://www.gov.mb.ca/aesi/apprenticeship/generalinfo/instructoreducators.html

Note: No percentage-weightings for test purposes are prescribed for this unit's objectives. Instead, a "Pass/Fail" grade will be recorded for the unit in its entirety.

Unit: E3 Communication and Basic Computer Skills

Level: One

Duration: 15 hours

Theory: 10 hours Practical: 5 hours

Overview:

Upon completion of this unit of instruction the apprentice will demonstrate knowledge of effective communication practices and communication equipment and their applications. The unit includes coverage of the importance of clients and effective techniques for addressing customer complaints.

Objectives and Content: Percent of Unit Mark (%)

1. Describe the communication skills/modes used in the workplace.

- a. Verbal communication
 - Face to face contact
 - Telephone
 - · Group environment
- b. Written communication
 - · Letters and memos
 - Fax
 - Email

2. Describe the importance of the client.

10%

10%

- a. Costs and benefits of retaining a client
- b. Costs and benefits of gaining new clients
- c. Value of repeat business
- d. Techniques for recovering 'lost' clients

3. Describe effective techniques for addressing client complaints.

10%

20%

- a. Written complaints
- b. Difficult situations with clients
 - · Angry clients
 - · Impatient clients
 - · Indecisive clients
 - Other situations

4. Describe techniques for maintaining good communication in the workplace.

- a. Internal communication
 - · Support staff
 - Fellow staff (colleagues)
 - Supervisors

		• Suppliers				
		Authorities (inspectors, general contractors)				
5.		scribe general organization and basic reading strategies for trade-related cuments.	10%			
	a.	Service bulletins				
	b.	Technical bulletins				
	c.	Service manuals				
	d.	Other publications				
	e.	Computer-based resources				
	f.	Online resources				
6.	Cre	eate trade-related documents using proper writing techniques.	10%			
	a.	Prepare a business email				
	b.	Define technical terms using expansion techniques				
	c.	Write instructions to inform readers				
	d.	Project planning				
7.	Demonstrate trade-related computer skills as specified by instructor.					
	a.	Office application programs				
		Word processor (e.g. Microsoft Word)				
		Spreadsheet (e.g. Microsoft Excel)				
		Presentation software (e.g. Microsoft PowerPoint)				
	b.	Internet searching skills for trade-related research				
		Search engines via Universal Resource Locator (URL) addresses				
		Key word search				
		Filtering results				
	c.	Using email for work related communications				
		Public email service

Theory: 5 hours Practical: 10 hours

Overview:

Upon completion of this unit of instruction the apprentice will demonstrate knowledge of basic nail tip application. The unit includes identification and description of hazards and safe work practices. Within this unit, the procedures and techniques of various nail tip application will be demonstrated, and emerging trends will explored.

Objectives and Content:

Percent of Unit Mark (%)

1. Define terminology associated with basic tip application.

10%

- a. Structure of the nail tip
 - Curvature
 - · Length
 - Size
 - · Tip well size
 - Customizing
- b. Types
 - Colour
 - Material
- c. Adhesives
- d. Finishing

2. Identify hazards and describe safe work practices when performing a basic tip 10% application.

- a. Ergonomics
- b. Personal protective equipment (PPE)
- c. Equipment
- d. Hygiene of the technician
- e. Infection control
- f. Manufacturers' recommendations
- g. Infection and exposure to bodily fluids
- h. Contraindications for nail and skin health
- i. First Aid

3. Describe and list supplies needed to perform a basic tip application.

20%

- a. Equipment
 - · Manicure table

 - a. Eyebrow and eyelash tint
 - b. Eyelash lift
 - c. Eyebrow lamination
 - d. Eyelash extensions
- 6. Discuss and demonstrate emerging trends in eyelash and eyebrow services.

E8 Journeyperson Trainer Unit:

Level: One

Duration: 7 hours

> Theory: 7 hours Practical: 0 hours

Overview:

Level One in-school technical training offers an entry-level orientation to the challenges of apprenticeship training as it relates to the development of core tasks and skill requirements, as well as social competencies. This unit introduces senior apprentices to the responsibilities of workplace training that they will assume as supervising journeypersons. Most trades have a rich tradition of refreshing and sharing their trade skills from one generation of trade practitioner to the next. This unit orients senior apprentices to some of the practical and conceptual tools that can enable them to contribute to this trade heritage when they become certified journeypersons and, ultimately, journeyperson trainers.

The journeyperson's obligation to assist entry-level apprentices to develop skills and knowledge is complex and challenging. It involves safety considerations, employer expectations, provincial regulations, as well as the tradition of skills stewardship that links modern practice with the long history of workplace teaching and learning that defines the apprenticeable trades. The ability to offer timely and appropriate support to apprentices is itself an important area of trade learning. This unit presents material intended to help refine this ability through reflection and discussion by senior apprentices, and discussion with their in-school instructor and journeyperson trainer.

This content reflects Manitoban and Canadian standards prescribed for journeyperson-level supervisory capabilities, as well as key topics in current research on the importance of workplace training in apprenticeship systems. These detailed descriptors represent suggested focal points or guidelines for potentially worthwhile exploration and are neither mandatory nor exhaustive.

Note: No percentage-weightings for test purposes are prescribed for this unit's objectives. Instead, a "Pass/Fail" grade will be recorded for the unit in its entirety.

Objectives and Content:

Percent of Unit Mark (%)

Compare/contrast role options and responsibilities of the supervising journeyperson.

n/a

- Implicit vs. explicit standards and content: training goals are/are not codified; assessment measures are/are not used
- Accountability for results: e.g., journeyperson is/is not required to prepare performance evaluation that could affect apprentice's employability or wage-rate, etc.
- Long-term vs. short-term supervision assignments e.g., considerable latitude/little latitude for apprentice to learn from mistakes
- Formally vs. informally structured e.g., supervision assignment is part of a prescribed cycle of assignments involving coordination among multiple journeypersons; apprentice is trained according to an individual training plan negotiated with employer
- Types of supervisory role options and what is implied by each:
 - Journeyperson Trainer (JT) role: often initiated by someone other than apprentice, 69

06-2024

- and limited to a particular skill set, task, or production requirement
- Mentor role: often initiated by apprentice, and relatively open-ended regarding content, duration, etc.
- Peer role: typically involves individual upgrading or cross-training of one journeyperson by another; can include senior apprentice assisting lessexperienced trade learner
- Coordinator role: often a senior-level journeyperson appointed by an organization to assume responsibilities for monitoring progression of groups of apprentices
- Other roles: may be improvised by journeyperson, such as a combination of multiple roles of the above

2. Describe and demonstrate common requirements about providing journeyperson level supervision.

- a. Apprenticeship learning adapted to journeyperson supervision assignments and a journeyperson perspective
 - Application of adult education concepts to trades teaching and learning (e.g., responsibilities and expectations of senior-level apprentices)
 - Practical significance of 'styles' of adult learning and teaching
 - Helping senior-level apprentices integrate in-school technical training and on-thejob practical training experiences
 - · Providing help and guidance about new tasks and skills
 - · Providing help and guidance about fixing mistakes
 - Learning and teaching "the ropes" socialization of apprentice within a community
 of trade practice (e.g., how to borrow a tool, interrupt a journeyperson, seek
 advice of experienced co-workers)
 - Coverage and documentation of prescribed tasks and subtasks where applicable
 - Discuss the limits of the journeyperson trainers' own responsibilities and competence (e.g., scope, willingness to train, etc.)
 - Benefits of maintaining a personal record of achievements, ideas, and needs as a journeyperson trainer (e.g., resume, portfolio, training credentials, logbook, etc.)
- Individual reflection and guided group discussion about personal experiences of workplace learning as an apprentice
 - Identification of best and worst practices of a journeyperson trainer
 - Identification of workplace and other factors that can contribute to good and bad trades teaching/learning experiences
 - Development of professional standards and work ethics about responsibility to share one's knowledge and skill with others in the workplace (e.g., use/misuse of humour, rigour, discretion, craft-pride, etc.)
 - · Qualities of a good journeyperson trainer
 - Components of workplace journeyperson training
 - Processes and recommended practices re: journeyperson training
 - Troubleshooting problems re: supervision assignments
- c. Role of assessment in supervising, coaching, or guiding other people to learn or improve their skills (e.g., formative and summative evaluation), and how this might contribute to how the journeyperson-level supervision task is approached in future
- d. Compare and contrast discussion results with current knowledge and resources about workplace training methods as they apply to journeyperson-level supervision assignments
- e. Other (as may be specified by instructor)

Unit: N14 Pre-Provincial Exam Review

Level: One

Duration: 7 hours

Theory: 7 hours Practical: 0 hours

Overview:

This unit offers senior apprentices a systematic review of skills and knowledge required to pass the Provincial Examination. It promotes a purposeful personal synthesis between on-the-job learning and the content of inschool technical training. The unit includes information about the significance of Provincial certification and the features of the Provincial Examination.

Note: No percentage-weightings for test purposes are prescribed for this unit's objectives. Instead, a "Pass/Fail" grade will be recorded for the unit in its entirety.

Objectives and Content:

Percent of Unit Mark (%)

- Describe the significance, format and general content of Provincial Examinations n/a for the trade of Esthetician.
 - a. Scope and aims of Provincial certification; value of certifications
 - b. Obligations of candidates for Provincial certification
 - Relevance of Provincial Examinations to current, accepted trade practices, and industry-based provincial
 - Supplemental Policy (retesting)
 - Confidentiality of examination content
 - c. Multiple-choice (four-option) item format, Provincial standards for acceptable test items
 - d. Government materials relevant to the Provincial Examinations for Esthetician apprentices
 - Provincial Occupational Standard (POS); prescribed scope of the skills and knowledge which comprise the trade
 - POS "Pie-chart" and its relationship to content distribution of Provincial Examination items
- 2. Identify resources, strategies and other considerations for maximizing successful n/a completion of written examinations.
 - a. Personal preparedness
 - Rest
 - Nutrition
 - · Personal study regimen
 - Prior experience in test situations (e.g., unit tests)
 - b. Self-assessment, consultation and personal study plan
 - Self-assessment of individual strengths/weaknesses in trade related skills and knowledge
