

Bovine Tuberculosis Prevention Program

Location of Riding Mountain Eradication Area (RMEA) and Core Area

The RMEA is the zone comprised of Game Hunting Areas 23 and 23A, which surround Riding Mountain National Park. It is bounded by Highway 5 on the north and east, Highway 83 on the west, and Highway 45 and PR 357 – Mountain Road on the south.

The core area is located on the west side of the RMEA and includes parts of the rural municipalities of Rossburn, Grandview and Gilbert Plans. It is a high traffic zone for deer and elk movement. In the past, the majority of bTB infected wildlife and livestock have been located in the core area.

A listing of [core area legal land locations](#) can be used to more precisely determine if a farm is in the core area.
