# Guidelines For Estimating Canola Biodiesel Production Costs - Farm Fuel Based on 15,000 Litres per year

Date: May, 2011

This guide is designed to provide you with planning information and a format for calculating costs of production for on-farm biodiesel production based on the cost of growing canola on your farm. Opportunity costs related to potential canola market prices are included. Adjustments will be necessary when applying these figures to your own enterprise.

The budget estimates are based on a number of assumptions which are clearly defined in the supporting pages. Input costs are based on industry information. Proper plant management in the production process and compliance to all applicable environmental requirements is assumed. Most OEM require biodiesel to meet ASTM D6751 fuel quality standard.

**Disclaimer**: This budget is only a guide and is not intended as an in depth study of the cost of production of the Manitoba biodiesel industry. Interpretation and utilization of this information is the responsibility of the user. If you require assistance with developing your individual budget, please contact your local MAFRI Business Development Specialist.

## **Biodiesel Production Costs - Farm Fuel**

May, 2011

Based on 15,000 Litres and Canola Production Costs of \$256.23 per Acre and Yield of 39 bushels per Acre

A. Operating Costs	Cost/Litre	Total Cost Your Cost
1. Input Costs		
1.01 Feedstock - canola oil	\$0.3231	\$4,847
1.02 Methanol	\$0.0688	\$1,032
1.03 Catalyst	\$0.0088	<u>\$132</u>
Subtotal Input Cost	\$0.4007	\$6,011
2. Other Operating Costs		
2.01 Electricity	\$0.0145	\$218
2.02 Maintenance	\$0.0583	\$875
2.03 Misc. Administration	\$0.0333	\$500
2.04 Insurance	\$0.0117	\$175
2.05 Property Taxes	\$0.0210	\$315
Subtotal Operating Costs	\$0.1389	\$2,083
2.06 Operating Interest	\$0.0040	\$60
Total Operating Costs	\$0.5436	\$8,154
B. Fixed Costs		
3. Depreciation		
3.01 Buildings	\$0.0600	\$900
3.02 Equipment	\$0.0900	\$1,350
3.02 Equipment	ψ0.0300	Ψ1,000
4. Investment		
4.01 Buildings	\$0.0128	\$193
4.02 Equipment	\$0.0096	\$144
4.03 Land	\$0.0012	\$18
Total Fixed Costs	\$0.1736	\$2,604
Total Operating and Fixed Costs	\$0.7172	\$10,758
C. Labour	\$0.0960	\$1,440
Total Cost of Production	\$0.8132	\$12,198
		· ,
D. Value 5. Biodiesel		
5.01 Estimated on-farm biodiesel value	\$0.8850	\$13,275
5.02 Estimated increased fuel efficiency value	\$0.0222	\$334
5.03 Glycerol sales	\$0.0000	\$0
Total Value	\$0.0000	\$13,609
Total Value	ψ0.001.2	<u></u>
Total Value - Cost of Production	\$0.0940	\$1,410
Breakeven price	\$/Litre	\$ Cost of Prod./Bushel
A. Operating Costs	\$0.5214	\$9.4806
B. Operating & labour Costs	\$0.6174	\$8.7122
C. Operating & Fixed Costs	\$0.6950	\$8.0909
D. Operating, Fixed & Labour Costs	\$0.7910	\$7.3225
Breakeven Price \$/Litre = (Cost - (Total Value - Est. on-farm	biodiesel value))	÷ 15,000 litres

Breakeven Price \$/Litre = (Cost - (Total Value - Est. on-farm biodiesel value)) ÷ 15,000 litres
Breakeven Price \$COP/Bu. = Total Value - Cost ÷ 1874 bu. of canola + \$6.57 COP per bu. (with canola meal = \$262.15/tonne)

Opportunity Cost - Value Added Processing	\$/Bushel	Total
Biodiesel processing margin	\$0.75	\$1,410
- Canola grain marketing margin	\$5.68	\$10,645
= Net Benefit from Value Added Processing	-\$4.93	-\$9,235

Biodiesel processing margin \$/Bu = (Total Value - Cost of Production = \$1410) ÷ 1874bu. of canola Canola grain marketing margin \$/Bu = \$12.25/bu canola market price - \$6.57 COP per bu. canola

**Disclaimer:** This budget is only a guide and is not intended as an in-depth study of the cost of production of this industry. Interpretation and utilization of this information is the responsibility of the user. No liability for decisions based on this publication is assumed.

# **Biodiesel Production Costs - Input**

# **Assumptions**

- 1. This budget outlines the cost of production for a biodiesel operation.
- 2. Buildings and equipment are valued at new cost.
- 3. All canola feedstock is valued at cost of production.
- 4. Feedstock cost (vegetable oil) includes the market value of canola meal produced.
- 5. All Biodiesel produced is for farm use only.

#### **Biodiesel Plant Production**

Plant size - thousands of litres annually	15
Days per year	30
Hours operation per day	8
Employees per shift - biodiesel production	0.25
Labour Rate	<b>\$12.00</b> / hour

Vegetable oil required per litre biodiesel	<b>0.99088</b> litres
Methanol	<b>\$460</b> / tonne
Methanol recovery	<b>25</b> %
Catalyst - potassium hydroxide	<b>\$600</b> / tonne

Glycerol	<b>\$0</b> / tonne
Diesel (coloured) farm fuel - ULSD	<b>\$0.8850</b> / litre
On-farm biodiesel blend usage	<b>20</b> %
On-farm fuel efficiency increase with biodiesel use	<b>0.5</b> %

#### **Canola Oil Production**

Canola cost of production	<b>\$256.23</b> / acre
Canola average yield - bushels	<b>39.0</b> / acre
Canola market price per bushel	<b>\$12.25</b> / bushel
Canola meal - 34% protein	<b>\$262</b> / tonne
Days per year	30
Hours operation per day	8
Employees per shift - canola oil production	0.25
Labour Rate	<b>\$12.00</b> / hour
Canola seed oil content	<b>42.0</b> %
Residual oil in canola meal	<b>10.0</b> %
Shrinkage in oilseed processing	<b>1.0</b> %
Residual oil in canola meal (solvent extraction)	<b>3.5</b> %
Barley price - 76% Total Digestible Nutrients	<b>\$4.00</b> / bushel
Extra oil meal premium	0 %
Canola oil bulk density	<b>0.915</b> kg / L

# **Other Operating Costs**

Electricity	\$0.06899	/ kWhr
Maintenance	2.5	%
Misc. Administration	\$500	/ year
Insurance	0.5	%
Property taxes	1.5	%
Investment Rate	1.75	%
Operating Interest Rate	5.75	%

# **Capital Costs**
