

Innovation Workshop Series

Ingredient Solutions for your Food Processing Business

Thursday, November 16, 2023

Join us for an Innovative Food Ingredient Workshop

- Connect with ingredient suppliers from Canada and the U.S. to discover how using innovative ingredients can solve challenges in the bakery, dairy, beverage, meat product and plant-based sectors
- Hands-on demonstrations
- Networking opportunities
- FREE to attend

Presentations include:

- **Big Deal Ingredients** - Incorporating functional starch ingredients in various food products
- **GNT USA** - Achieving bright and stable colors in plant-based beverages, confections and foods
- **OSF Flavors** - Using flavors and maskers to solve flavour challenges in plant-based food and beverage applications
- **Ingredion** - Reducing sugar in food and beverage products and ingredient solutions for plant-based food products
- **Source Nutraceutical Inc** - Updating NFT's after changing product formulations, and new front of packaging changes and how it will affect product labels
- **Prairie Research Kitchen** – Overview of the services offered
- **Food Development Centre** – Overview of the services offered
