

What Qualifies

AgriRecovery Livestock Transportation Drought Assistance

Helps livestock producers offset freight expenses associated with moving their eligible breeding herd to alternate feeding locations due to shortages of feed.

Primary Producers

- Owned or leased the eligible breeding animals between June 1, 2021 and March 15, 2022 or later
- Have a minimum of 10 eligible breeding animals (per type of livestock)

Breeding Animals

- Mature females exposed to breeding (natural service or artificial insemination)
- Males used previously for breeding
- Immature replacement females are not eligible

Eligible Breeding Animals

- Beef cattle
- Sheep
- Goats

Eligible Alternate Feeding Locations

- Farms, custom feeders and other livestock operations where breeding animals must be relocated to address a shortfall in winter feed capacity
- Locations are not owned, leased or rented by the eligible producers
- Must be capable of housing and providing adequate feed, water and care
- Movement to a normal wintering site is not eligible
- Animals must remain in the new location for at least 30 days
- Animals cannot be sold or marketed prior to returning to the location of origin when temporary feeding is complete

Eligible Distance

- Minimum distance of 40 kilometres to a maximum one-way distance of 1,000 kilometres

Date of Eligible Expenses

- Incurred from August 1, 2021 to June 30, 2022
