

# Average Date of the First Fall Frost at 0°C

Date of the First Fall Frost	
	August 12 to August 17
	August 18 to August 22
	August 23 to August 27
	August 28 to September 1
	September 2 to September 6
	September 7 to September 11
	September 12 to September 16
	September 17 to September 21
	September 22 to September 26

# Agricultural Representatives Offices  
\$ Agricultural Regional Offices

The date of the first fall frost (0°C) determines the end of the growing season. In addition, early fall frosts can adversely affect seed quality, oil content and grade.

An average map represents a 50% risk. In other words, in 1 out of 2 years the first fall frost would be expected to occur earlier than the dates given on this map.
