

# GETTING THE JOB DONE IN AGRICULTURE

**Budget 2019 keeps our promises by fixing the finances, repairing services and rebuilding our economy.**

**We're investing in results for Manitobans and continuing on the road to recovery by strengthening our agricultural sector including:**

- **increasing investments in the Young Farmer Rebate Program to help address the rising costs of starting a farm operation;**
- **developing a first-of-its-kind sustainable protein strategy to ensure Manitoba producers and processors will continue to lead plant and animal protein development;**
- **reducing administrative and lending costs at the Manitoba Agricultural Services Corporation, achieved through efficiencies and the strong performance of its lending portfolio;**
- **seeing growth in private dollar investments and value-added processing; and**
- **continuing our support for income stabilization programs for producers.**
