Haddii aad daryeeleysid xubin reerkaaga ah ama qol wadaag ah, iska ilaali inaad la xiriiro dadka kale. Is-karantiil (karantiil) lana soco calaamadaha jirrooyinka (tusaale, qandho / xummad, qufac, hungur xanuun / cod xabeeb ah, neefta oo kugu dhegta, dhadhamin la'aantaada ama urkaaga, ama haddii aad matagto ama aad shuban qabto in ka badan 24 saacado, ama calaamado kale oo ku taxan qalabka baaritaanka COVID-19) 14 maalmood laga bilaabo xiriirkii kuugu dhowaa ee aad garanaysay. By providing care you may need to isolate/self-isolate for a total of 24 days. If this is not realistic, consider having the case speak to their public health nurse about alternative isolation options. Haddii aad si buuxda u tallaalan tahay, waxaa laga yaabaa inaad u baahnayn inaad is-go'doomiso, laakiin waa inaad iskaa u kormeertaa astaamaha COVID-19 muddo 14 maalmood ah xiriirkii kuugu dhowaa ee kuugu dhowaa ee la yaqaan.

Isticmaal adeeg gaarsiin ama adeeg soo qaadid, ama weydii saaxiibbada iyo xubnaha goyska in ay kuusoo dhigaan alaabada iyo raashinka albaabkaaga hortiisa si looga fogaado in lala xiriiro dadka kale. Ha u oggolaan martida inta aad daryeeleyso xubin reerka ka tirsan oo qaba COVID-19. Jooji ama ogeysii adeeg bixiye kasta oo had iyo jeer gurigaaga u soo galo in xubin reerka ka mid ah jiran yahay, qabo COVID-19, ama sugayo natiijooyinka baaritaanka. Tan waxaa ka mid ah shaqaalaha daryeelka guriga, daaweeyayaasha shaqada, jimicsiga jirka, shaqaalaha bulshada, iwm. Adeeg bixiyeyaashu waxay ka wada hadli doonaan sida ugu wanaagsan ee daryeelka loo bixiyo inta lagu jiro waqtigan.
