PERSONAL CARE HOMES,
DIGITAL HEALTH AND HEALTH-CARE CAPITAL PROJECTS

The safety and capital upgrades at personal care homes include:

- sprinkler protection,

- fire alarm voice communication systems,

- carbon monoxide detection,

- emergency lighting,

- infection control measures so not to affect residents, and

- planning and phasing of moving vulnerable residents.

The digital health projects include:

- managed video collaboration,

- citizen access to digital COVID-19 results,

- provincial electronic home care system upgrades phase 2,

- eChart upgrade,

- Windows 10 upgrade,

- provincial chronic care remote monitoring system,

- electronic patient record upgrade, and

- primary care enrolment and information sharing.

The safety and security projects for health-care facilities include:

- fire alarm system upgrades at the Kin Place personal care home in Oakbank and the Flin Flon General Hospital;

- fire system repairs at facilities in Teulon, Minnedosa, Virden, Ste. Rose, Reston, Erickson, Souris, Elkhorn, Deloraine, at Holy Family Home in Winnipeg and at the Seven Oaks General Hospital;

- nurse call system replacements and upgrades at facilities in Winnipeg, Selkirk, Killarney, Minnedosa, Virden, Melita and Dauphin;

- roof repairs/replacements at Health Sciences Centre, Concordia and Seven Oaks hospitals in Winnipeg and at facilities in Whitemouth and Shoal Lake;

- elevator upgrades at Bethania Personal Care Home, Actionmarguerite St. Joseph Personal Care Home and the Convalescent Home of Winnipeg; and

- mechanical and electrical system repairs/upgrades at CancerCare Manitoba.
