

COVID-19 VACCINE

Manitoba's Immunization Roll-out Plan January 2021

Based on current projections for vaccine deliveries, the first two charts outline Manitoba's immunization plan for the Pfizer vaccine from January to March 2021. These may be adjusted as additional priority populations are identified, based on the site(s) that may be most effective at providing immunization.

Lowest Inventory Level

Based on projected deliveries, this chart shows the lowest inventory levels of the Pfizer vaccine that are anticipated at each site from January to March 2021.

Planning Projection Only

This chart provides a projection of how much vaccine may be available in 2021 and the percentage of Manitoba's eligible population that may be immunized over that time.
