

**WINNIPEG PROTECTIVE CARE CENTRE
PUBLIC QUARTERLY REPORT
REPORTING PERIOD: APRIL 1, 2026- JUNE 30, 2026**

EXECUTIVE SUMMARY:

The Winnipeg Protective Care Centre (PCC) is a health and public safety approach where intoxicated individuals who are in danger to themselves and/or others can remain for up to 72 hours to recover from intoxication. Individuals are assessed and monitored on-site by health and social services professionals. While at the centre, individuals are offered food, water, medical care as well as referrals to various mental health and addictions supports and community resources.

The PCC began service delivery on December 2, 2025, 24/7, with 20 rooms for individuals under the influence of alcohol. Effective March 4, 2026, four of the 20 safe rooms were made available to individuals under the influence of methamphetamine or other non-alcohol substances, following assessment at hospital.

QUARTERLY REPORTING SUMMARY:

This report covers Q1 of the 2026/27 fiscal year. The data below captures the number of alcohol and non-alcohol (e.g. methamphetamine) admissions, including the average and longest length of stay.

Disclaimer: The data below has limitations due to variability in reporting accuracy and consistency. Reliability will improve over time as data collection and processing methods continue to evolve.
