Arthur A. Leach School  
1827 Chancellor Dr.  
Winnipeg, MB  
R3T 4C4

Dear Parent/Guardian of Students at Arthur A. Leach School,

Manitoba public health officials advised Arthur A. Leach School today of a confirmed case of COVID-19 in the school on November 16 and 18 when the individual may have been infectious.

Arthur A. Leach School is working closely with public health officials and following their recommendations. Based on the public health investigation, this exposure was assessed to be low risk. The infection was not believed to be acquired at school. At this time, no close contacts have been identified at Arthur A. Leach School. No one is required to self-isolate from this exposure. Anyone in same class has been advised to self-monitor for symptoms.

Please note: the school centre is not permitted to release the name or any identifying information about the confirmed case of COVID-19 to any member of the school, community or media.

If you have not been contacted by a letter from public health officials, your child(ren) have not been identified as being exposed to COVID-19 from this case. If your child develops a new onset or worsening of any one symptom listed in Column A or any two or more symptoms listed in Column B (see table below), even if they are mild, immediately isolate them from others. It is recommended your child get tested for COVID-19 as soon as symptoms appear. You may go directly to the nearest COVID-19 testing location during their open hours. For the testing site nearest you, please visit <https://www.gov.mb.ca/covid19/updates/testing.html>, or call Health Links—Info Santé at 204-788-8200 or toll-free at 1-888-315-9257.

| A   | B                           |
|---|-----------------------------|
| Fever/Chills                                | Runny nose                  |
| Cough                                       | Muscle aches                |
| Sore throat/hoarse voice                    | Fatigue                     |
| Shortness of breath/difficulty breathing    | Pink eye (conjunctivitis)   |
| Loss of taste or smell                      | Headache                    |
| Vomiting or diarrhea for more than 24 hours | Skin rash of unknown cause  |
|   | Nausea or loss of appetite  |
|   | Poor feeding (if an infant) |

Please note: individuals with symptoms outlined in columns A and B, who choose not to be tested, must isolate for a minimum of 10 days following the start of symptoms. Isolation can be stopped at day 10 if the individual has been symptom free for 24 hours.

For more public health information about COVID-19, please visit <https://manitoba.ca/covid19/updates/resources.html>.

Sincerely,

Dr. Heejune Chang  
 Medical Officer of Health  
 Winnipeg Regional Health Authority
