École George V School
265 Grey St.
Winnipeg, MB R2L 1V6

Dear Parent/Guardian of Students at École George V School,

Manitoba public health officials advised École George V School today of a confirmed case of COVID-19 in the school on December 9th when the individual may have been infectious.

École George V School is working closely with public health officials and following their recommendations.

Based on the public health investigation, this exposure was assessed to be low risk overall for the school community. Close contacts connected to the case have been identified by public health. Anyone who is a close contact has received a letter notifying that they are a close contact and been advised to self-isolate (quarantine).

The school will remain open to all other students and staff, who can continue to attend school in person. Anyone else who was in same cohort who have not been told to isolate (quarantine) is recommended to self-monitor for symptoms up to and including December 23rd and seek testing if symptoms develop.

Please note: the school is not permitted to release the name or any identifying information about the confirmed case of COVID-19 to any member of the school, community or media.

<<If you have not been contacted by a letter from public health officials, your child(ren) have not been identified as being exposed to COVID-19 from this case.>> If your child develops a new onset or worsening of any one symptom listed in Column A or any two or more symptoms listed in Column B (see table below), even if they are mild, immediately isolate them from others. It is recommended your child get tested for COVID-19 as soon as symptoms appear. You may go directly to the nearest COVID-19 testing location during their open hours. For the testing site nearest you, please visit <https://www.gov.mb.ca/covid19/testing/locations.html>, or call Health Links—Info Santé at 204-788-8200 or toll-free at 1-888-315-9257. Public health officials are also advising anyone who is symptomatic, or has a household member who is symptomatic, that the entire household needs to self-isolate pending COVID-19 test results.

A	B
Fever/Chills	Runny nose
Cough	Muscle aches
Sore throat/hoarse voice	Fatigue
Shortness of breath/difficulty breathing	Pink eye (conjunctivitis)
Loss of taste or smell	Headache
Vomiting or diarrhea for more than 24 hours	Skin rash of unknown cause
	Nausea or loss of appetite
	Poor feeding (if an infant)

Please note: individuals with symptoms outlined in columns A and B, who choose not to be tested, must isolate for a minimum of 10 days following the start of symptoms. Isolation can be stopped at day 10 if the individual has been symptom free for 24 hours.

For more public health information about COVID-19, please visit <https://manitoba.ca/covid19/updates/resources.html>.

Sincerely,

Dr. Shilpa Loewen
