Ste. Rose School  
280 Gendreau Street  
Sainte Rose du Lac, MB  
R0L 1S0

Dear Parent/Guardian of Ste. Rose School student(s),

Manitoba public health officials advised Ste. Rose School on December 26, 2020 of a confirmed case of COVID-19 in the school on Thursday December 17, 2020 when they may have been infectious.

Ste. Rose School is working closely with public health officials and following their recommendations.

Be assured that public health investigations to identify individuals who may have been exposed begin within 24 hours of a confirmed laboratory test. Anyone identified as a close contact will be contacted by phone or letter and provided instructions for self-isolation (quarantine). Testing may also be recommended.

Based on the public health investigation, this exposure was assessed to be low risk. The infection was not believed to be acquired at school. At this time, no close contacts have been identified at Ste. Rose School. No one is required to self-isolate from this exposure.

Please note: Ste. Rose School is not permitted to release the name or any identifying information about the confirmed case of COVID-19 to any member of the school, community or media.

If your child develops a new onset or worsening of any one symptom listed in Column A or any two or more symptoms listed in Column B (see table below), even if they are mild, immediately isolate them from others. It is recommended your child get tested for COVID-19 as soon as symptoms appear. You may go directly to the nearest COVID-19 testing location during their open hours. For the testing site nearest you, please visit <https://www.gov.mb.ca/covid19/updates/testing.html>, or call Health Links—Info Santé at 204-788-8200 or toll-free at 1-888-315-9257.

<b>A</b>	<b>B</b>
Fever/Chills	Runny nose
Cough	Muscle aches
Sore throat/hoarse voice	Fatigue
Shortness of breath/difficulty breathing	Pink eye (conjunctivitis)
Loss of taste or smell	Headache
Vomiting or diarrhea for more than 24 hours	Skin rash of unknown cause
	Nausea or loss of appetite
	Poor feeding (if an infant)

Please note: individuals with symptoms outlined in columns A and B, who choose not to be tested, must isolate for a minimum of 10 days following the start of symptoms. Isolation can be stopped at day 11 if the individual has been symptom free for 24 hours.

For more public health information about COVID-19, please visit <https://manitoba.ca/covid19/updates/resources.html>.

Sincerely,

A handwritten signature in black ink that reads "Natalie Casaclang". The signature is written in a cursive, flowing style.
