October 23, 2020

École Tuxedo Park School  
2300 Corydon Ave.  
Winnipeg, MB  
R3P 0N6

Dear Parent/Guardian of Student at École Tuxedo Park School

Manitoba public health officials advised École Tuxedo Park School today of a confirmed case of COVID-19 present in the school on October 14 and 15, 2020 when the individual may have been infectious.

École Tuxedo Park School is working closely with public health officials and following their recommendations.

Public health has advised that the affected cohort begin quarantine (isolation) as of today. Investigation of the situation is ongoing. At the present time, public health anticipates that quarantine (isolation) will continue for these contacts until October 29 but this may be lengthened or shortened as the investigation continues.

All other cohorts can continue to attend school in person. Please note: the school is not permitted to release the name or any identifying information about the confirmed case of COVID-19 to any member of the school, community or media.

If you have not been contacted by public health officials, your child(ren) have not been identified as being exposed to COVID-19 from this case. However, if your child develops a new onset or worsening of any one symptom listed in Column A or any two or more symptoms listed in Column B (see table below), even if they are mild, immediately isolate them from others. It is recommended your child get tested for COVID-19 as soon as symptoms appear. You may go directly to the nearest COVID-19 testing location during their open hours. For the testing site nearest you, please visit [gov.mb.ca/covid19/locations.html](http://gov.mb.ca/covid19/locations.html), or call Health Links-Info Santé at 204-788-8200 or toll-free at 1-888-315-9257.

A	B
Fever/Chills	Runny nose
Cough	Muscle aches
Sore throat/hoarse voice	Fatigue
Shortness of breath/difficulty breathing	Pink eye (conjunctivitis)
Loss of taste or smell	Headache
Vomiting or diarrhea for more than 24 hours	Skin rash of unknown cause
	Nausea or loss of appetite
	Poor feeding (if an infant)

Please note: individuals with symptoms outlined in columns A and B, who choose not to be tested, must isolate for a minimum of 10 days following the start of symptoms. Isolation can be stopped at day 10 if the individual has been symptom-free for 24 hours.

For more public health information about COVID-19, please visit <https://manitoba.ca/covid19/updates/resources.html>.

Sincerely,

Dr. Heejune Chang  
 Medical Officer of Health
