

November 1, 2020

Shaftesbury High School
 2240 Grant Ave
 Winnipeg, MB R3P 0P7

Dear Parent/Guardian of Students at Shaftesbury High School,

Manitoba public health officials advised Shaftesbury High School today of two confirmed cases of COVID-19 present in the school on October 23 and 27, 2020 when the individuals may have been infectious.

Shaftesbury High School is working closely with public health officials and following their recommendations. Based on the public health investigation, these exposures were assessed to be low risk overall for the school community. Classroom contacts are being advised to monitor for symptoms and seek testing if symptoms develop, effective today.

Please note: the school is not permitted to release the name or any identifying information about the confirmed cases of COVID-19 to any member of the school, community or media.

If you have not been contacted via a separate letter, your child(ren) have not been identified as being exposed to COVID-19 from these cases. However, if your child develops a new onset or worsening of any one symptom listed in Column A or any two or more symptoms listed in Column B (see table below), even if they are mild, immediately isolate them from others. It is recommended your child get tested for COVID-19 as soon as symptoms appear. You may go directly to the nearest COVID-19 testing location during their open hours. For the testing site nearest you, please visit gov.mb.ca/covid19/locations.html, or call Health Links-Info Santé at 204-788-8200 or toll-free at 1-888-315-9257.

| A | B |
|--|---------------------------|
| Fever/Chills | Runny nose |
| Cough | Muscle aches |
| Sore throat/hoarse voice | Fatigue |
| Shortness of breath/difficulty breathing | Pink eye (conjunctivitis) |
| Loss of taste or smell | Headache |

| | |
|---|-----------------------------|
| Vomiting or diarrhea for more than 24 hours | Skin rash of unknown cause |
| | Nausea or loss of appetite |
| | Poor feeding (if an infant) |

Please note: individuals with symptoms outlined in columns A and B, who choose not to be tested, must isolate for a minimum of 10 days following the start of symptoms. Isolation can be stopped at day 10 if the individual has been symptom-free for 24 hours.

For more public health information about COVID-19, please visit <https://manitoba.ca/covid19/updates/resources.html>.

Sincerely,

Dr. Lisa Richards MD MSc FRCPC
Medical Officer of Health
