## Spotlight on: *No Quiet Place*

Colloquially known as the Kimelman report, “**No Quiet Place**” is the most sought-after government report regarding the Sixties Scoop. The Legislative Library is one of the only libraries in the world that has copies of this very rare document. To ensure everyone has access to this important report, the Library also has created a digitized copy available through its [Catalogue](#) and Digital Collection ([Part 1](#) and [Part 2](#)).

## Librarian's Picks

Objectives and key results : driving focus, alignment, and engagement with OKRs / Paul R. Niven, Ben Lamorte.  
Hoboken : Wiley, 2016. xx, 204 pages.

From the publisher:

*Objectives and Key Results* is the first full-fledged reference guide on Objectives and Key Results, a critical thinking framework designed to help organizations create value through focus, alignment, and better communication. Written by two leading OKRs consultants and researchers, this book provides a one-stop resource for organizations

looking to quantify qualitative goals and ensure each team focuses their efforts to make measureable progress on their most important goals. [...] From the basic framework to a detailed dissection of best practices, this informative guide walks you through real-world implementations to help you get the most out of OKRs. [...] From the framework's inception in the 1980s to its popularity in today's hyper-competitive environment, OKRs make work more engaging and feature frequent feedback cycles that enable workers to see the progress they make at work each and every day. This book shows you everything you need to know to implement OKRs effectively. [...]

*Objectives and Key Results* is your key resource for designing, planning, implementing, and maintaining your OKRs program for sustainable company-wide success.

When : the scientific secrets of perfect timing / Daniel H. Pink.  
New York : Riverhead Books, 2018. 258 pages.

Review from Publishers Weekly Reviews:

Pink should change many people's understanding of timing with this book, which provides insights from little-known scientific studies in an accessible way. He quickly piques readers' interest by introducing seemingly inexplicable patterns: why are prisoners eligible for parole more likely to get a favorable ruling from a judicial panel earlier in the day? Why are adolescents who start school before 8

a.m. at an academic disadvantage? Why are there more complications from anesthesia in the afternoon? The explanations come from research about "the effect of the time of day" on people's thoughts and emotions, which began over a century ago, and which is being refined further now that social media platforms provide a wealth of data that can be analyzed from a chronological perspective. An analysis of millions of tweets from around the world, for instance, revealed a pattern that crossed continents and ethnic groups: "Tweeters felt active, engaged, and hopeful" in the morning and early evening. This is just one of the many findings with practical implications that Pink lays out in the "Time Hacker's Handbook," short sections that follow each chapter. By the book's end, readers will be thinking much more carefully about how they divide up their days and organize their routines.

[Balanced scorecard evolution : a dynamic approach to strategy execution](#) / Paul R. Niven. Hoboken : Wiley, 2014. xvi, 352 pages.

From the publisher:

The future of business has become so unpredictable that your five-year plan may be irrelevant next week. To succeed in the modern market, you must constantly assess your progress and adapt on the fly. Agility, flexibility, continual learning, and adaptation are the new rules of business success. A differentiating strategy is crucial, but it will only lead to competitive advantage if you execute it flawlessly. You'll succeed only if you have the right insight for strategic

planning and the agility to execute your plan.

*Balanced Scorecard Evolution: A Dynamic Approach to Strategy Execution* provides the latest theory and practice from strategic planning, change management, and strategy execution to ensure your business is flexible, future ready, and primed for exceptional execution. [...]

Making a plan isn't enough. You must actually take steps to implement your plan, and this requires excellent leadership skills. Change can be hard, and your organization may be resistant. *Balanced Scorecard Evolution: A Dynamic Approach to Strategy Execution* provides everything you need to make things happen.

[Ingenious : how Canadian innovators made the world smarter, smaller, kinder, safer, healthier, wealthier, and happier /](#)

David Johnston, Tom Jenkins.

Hardcover edition. Toronto : Signal, McClelland & Stewart, 2017. xiii, 232 pages.

From the publisher:

Successful innovation is always inspired by at least one of three forces -- insight, necessity, and simple luck. *Ingenious* moves through history to explore what circumstances, incidents, coincidences, and collaborations motivated each great Canadian idea, and what twist of fate then brought that idea into public acceptance. Above all, the book explores what goes on in the mind of an innovator, and maps the incredible spectrum of personalities that have struggled to improve the lot of their neighbours, their fellow citizens, and their species.

From the marvels of aboriginal invention such as the canoe, snowshoe, igloo, dogsled, lifejacket, and bunk

bed to the latest pioneering advances in medicine, education, philanthropy, science, engineering, community development, business, the arts, and the media, Canadians have improvised and collaborated their way to international admiration. *Ingenious* tells you why they did it and how they made the world a better place.

[Platform capitalism /](#)

Nick Srnicek, Laurent de Sutter.

Cambridge : Polity, 2017. vi, 171 pages.

From the publisher:

What unites Google and Facebook, Apple and Microsoft, Siemens and GE, Uber and Airbnb? Across a

wide range of sectors, these firms are transforming themselves into platforms: businesses that provide the hardware and software foundation for others to operate on. This transformation signals a major shift in how capitalist firms operate and how they interact with the rest of the economy: the emergence of **“platform capitalism”**.

This book critically examines these new business forms, tracing their genesis from the long downturn of the 1970s to the boom and bust of the 1990s and the aftershocks of the 2008 crisis. It shows how the fundamental foundations of the economy are rapidly being carved up among a small number of monopolistic platforms, and how the platform introduces new tendencies within capitalism that pose significant challenges to any vision of a post-capitalist future. This book will be essential reading for anyone who wants to understand how the most powerful tech companies of our time are transforming the global economy.
