INTRODUCTION

The Manitoba Estimates of Expenditure for the Fiscal Year Ending March 31, 2005 detail the expenditure intentions of the government as presented in The 2004 Manitoba Budget. The Estimates of Expenditure detail the annual appropriations to be approved by the Legislative Assembly through an appropriation act. Also reported in the Estimates of Expenditure, as required by section 30 of The Financial Administration Act, are statutory appropriations that are not voted on by the Legislature. Estimates of revenue for the same period are detailed in a separate document, Manitoba Estimates of Revenue for the Fiscal Year Ending March 31, 2005.

In order to assist in the review of these estimates, the following explanatory notes are provided.

Categories of Expenditure

The Estimates of Expenditure include two sections: Part A – Operating Expenditure and Part B – Capital Investment. Operating Expenditure relates to the annual cost of operating government programs and interest on public debt while Capital Investment relates to the cost of acquiring tangible capital assets according to the province's capital asset accounting policy where expenditures on tangible assets (excluding land) are amortized on an "expense" basis over the useful life of the asset. Beginning in 2004/05, the capital accounting policy has been changed to allow for capitalization of infrastructure, in accordance with the Canadian Institute of Chartered Accountants (CICA) public sector accounting standards. Prior to this year, tangible capital for infrastructure has not been recorded as assets, pending the results of a special study by the Public Sector Accounting Board of CICA. The research study recently confirmed the applicability of capitalization of infrastructure and Manitoba will now amortize these assets.

This accounting policy results in authority for capital investments being requested separately (Part B) with an annual amortization charge included in expenditure appropriations (Part A).

Part A – Operating Expenditure

This section of the Estimates of Expenditure includes three main categories as follows:

Operating Expenditure – expenditures related to the direct delivery of government programs and services, including salaries and general operating costs, grants to third parties and expenditures related to tax credit payments, pensions and other provisions.

Capital Grants – funds granted to third parties such as health authorities, schools and universities, for the construction of, or improvement to, capital assets owned by these third parties.

Costs Related to Capital Assets – annual provision for the cost of a capital asset that is used in the delivery of government programs. Tangible capital assets acquired in the past as well as those to be acquired in the 2004/05 fiscal year have an associated interest cost over the entire useful life of the asset as well as an expense based on pre-determined amortization rates. Recognizing amortization in this way allocates the cost of capital assets to the periods of service provided.

INTRODUCTION

Part B – Capital Investment

This section of the Estimates of Expenditure provides the authority for the annual purchase or acquisition of tangible capital assets which meet established guidelines for amortization. Tangible capital assets are those with a useful life extending beyond one year which are acquired, constructed or developed and held for use, not for resale. Tangible capital assets with a value less than the accepted capitalization limit will be expensed in the year of acquisition. As previously indicated, the annual amortization cost is reflected in Part A – Operating Expenditure as part of the annual cost of delivery of government programs. Details on the asset classifications, estimates of useful life and amortization rates for both general and infrastructure assets are provided in Appendix B on page 167.

The annual appropriation act provides authority for departmental expenditures including the annual amortization expense (Part A of the Estimates of Expenditure) as well as the annual authority for the capital investment contained in Part B of the Estimates of Expenditure. The authority raised for both Part A and Part B is annual authority and lapses at the end of the fiscal year.

Prior Year Estimates of Expenditure

The estimates of expenditure for the previous year include both the estimates of expenditure and supplementary estimates of expenditure that were approved by the Legislature by way of a supplementary appropriation act. In 2003/04 supplementary estimates were approved for Emergency Expenditures.

In order to make year over year comparisons meaningful, adjustments to the previous year's estimates figures may be necessary. These adjustments reflect organizational changes, as well as any other adjustments that may be required to provide comparability. Generally, the total of the previous year's estimates of expenditure does not change as a result of these adjustments. However, this year, as a result of the change in accounting policy, the 2003/04 estimates have been restated. The 2003/04 voted figures have also been adjusted in these estimates to reflect the departmental reorganization that occurred in November 2003.

Additional Expenditure Authority

Funds will be voted by the Legislature at the main appropriation level for both Part A and Part B by way of resolution numbers (abbreviated "Res. No." in the detailed estimates). Expenditure authority cannot be transferred between main appropriations except for transfers from appropriations listed under the service heading "Enabling Appropriations" (e.g. Canada-Manitoba Enabling Vote). If additional expenditure authority is required due to unforeseen circumstances, the government must introduce supplementary estimates of expenditure and a supplementary appropriation act when the House is sitting, or obtain authority through a special warrant if the House has recessed or adjourned for a period of time as specified in section 32 of The Financial Administration Act. Supplementary estimates of expenditure would form part of the total voted expenditure authority for that year as noted above. This same approval process applies to a main appropriation within Part B – Capital Investment.

Statutory Appropriations

Statutory appropriations contain expenditure authority approved by the Legislature by way of acts other than an appropriation act. Statutory appropriations exist for indemnities and retirement provisions for members of the Legislative Assembly, for various allowances related to functions and special duties performed by members, for certain electoral expenses, and for public debt. An "S" in the "Res. No." column of the detailed estimates denotes a statutory appropriation. As noted in the introductory paragraph, this is included in the estimates of expenditure for information purposes only and does not form a part of the appropriation act.

INTRODUCTION

Enabling Appropriations and Other Appropriations

In addition to departments, separate "service headings" exist to provide expenditure authority for programs that are delivered by a number of departments, where it is desirable to know the total amount allocated to the program, or where the allocation to various departments is not known at the time of printing the estimates. In some cases funding is allocated, as required, from the appropriation to departments by the Minister of Finance under authority granted by section 33 of The Financial Administration Act (Enabling Appropriations). In other situations, departments are granted authority to charge approved expenditures directly to the service heading. Several of these programs are included under the service heading entitled "Other Appropriations".

Recoveries

Over the past several years, the government has been pursuing a policy of better identifying the total costs of operating the various programs throughout government through the allocation of overhead costs to programs. Cost recoveries have been introduced for insurance, accommodations, desktop charges, grants in lieu of taxes, air services, certain employee benefits and costs related to tangible capital assets. Cost recoveries are generally noted in a separate sub-appropriation called "Less: Recoverable from other appropriations". This designates that part or all of the costs of this program are recovered from other programs by charging appropriations either in that department or other departments. Recoveries for services provided to programs not within the consolidated government entity are deposited to revenue.

Special Operating Agencies

Special operating agencies (SOAs) are service operations which are more directly responsible for their operating results and are granted increased management flexibility. These agencies can provide direct public services, internal services to government, science and technology services, or regulatory and enforcement programs. Special operating agencies are designated by regulation and operate under a charter approved by the Lieutenant Governor in Council. Funding for special operating agencies is normally not required in the annual estimates of expenditure as they are generally self-financing through their various fees and rates. However, each special operating agency is referenced in the estimates of the department responsible and a summary listing of special operating agencies is provided in Appendix A on page 163.

Estimates Supplements

Additional detail on estimates of expenditure for individual departments is available in estimates supplements produced by each department and tabled in the House.

APPENDIX A

SPECIAL OPERATING AGENCIES

As noted on page 7 of the introduction, special operating agencies are service operations which are more directly responsible for their operating results and are granted increased management flexibility. Funding for special operating agencies is normally not required in the annual estimates of expenditure as they are generally self-financing through their various fees and rates.

APPENDIX B
ACCOUNTING POLICY FOR CAPITAL EXPENDITURES

APPENDIX B ACCOUNTING POLICY FOR CAPITAL EXPENDITURES

The province implemented a change in accounting policy for general tangible capital assets in 1999/2000 based on standards issued by the Canadian Institute of Chartered Accountants (CICA). Beginning in 2004/05, infrastructure assets will be treated in the same manner as general assets. The CICA standards require that expenditures on tangible assets be amortized over the useful life of the asset. Recognizing amortization in this way allocates the cost of capital assets to the periods of service provided and amortization is recorded as an expense in the statement of operations.

Tangible capital assets are those with a useful life extending beyond one year which are acquired, constructed or developed and held for use, not for resale. Tangible capital assets with a value less than the accepted capitalization limit will be expensed in the year of acquisition.

The expected useful life of an asset takes into consideration the passage of time, normal wear and tear and the effects of technological obsolescence. The province has adopted a standard useful life for each asset class that is expected to remain the same over time. The straight-line method of amortization used reflects a constant charge for the service as a function of time.

Standard asset classes, capitalization limits and amortization rates for general and infrastructure assets related to this accounting policy are summarized below.

| Asset Description | Capitalization Limit (\$ dollars) | Useful Life (years) | Amortization Rate Straight-line (%) |
|--|---|------------------------|--|
| <u>GENERAL ASSETS</u> | | | |
| LAND | n/a | n/a | n/a |
| BUILDINGS - bricks, mortar and steel | 100,000 | 40 | 2.50 |
| BUILDINGS - wood frame | 100,000 | 25 | 4.00 |
| VEHICLES | 10,000 | 5 | 20.00 |
| AIRCRAFT AND VESSELS | | | |
| - Aircraft Frames | 10,000 | 24 | 4.17 |
| - Aircraft Motors | 10,000 | 5 | 20.00 |
| - Vessels | 10,000 | 24 | 4.17 |
| MACHINERY AND EQUIPMENT - other than for road construction and maintenance | 10,000 | 10 | 10.00 |
| MACHINERY AND EQUIPMENT - road construction and maintenance | 10,000 | 15 | 6.67 |
| COMPUTER HARDWARE - mainframe and mini computers | 50,000 | 10 | 10.00 |
| COMPUTER HARDWARE - personal computers | 10,000 | 4 | 25.00 |
| COMPUTER - major application | 500,000 | 15 | 6.67 |
| COMPUTER SOFTWARE - other | 10,000 | 4 | 25.00 |
| FURNITURE | 10,000 | 10 | 10.00 |
| LEASEHOLD IMPROVEMENTS | 100,000 | over term of lease | |

APPENDIX B
ACCOUNTING POLICY FOR CAPITAL EXPENDITURES

| Asset Description | Capitalization Limit (\$ dollars) | Useful Life (years) | Amortization Rate Straight-line (%) |
|-------------------------------------|---|------------------------|--|
| <u>INFRASTRUCTURE ASSETS</u> | | | |
| LAND IMPROVEMENTS | 100,000 | 30 | 3.33 |
| TRAFFIC/LIGHTING FACILITIES | 100,000 | 20 | 5.00 |
| BRIDGES AND STRUCTURES | 100,000 | 40 | 2.50 |
| PROVINCIAL ROADWAYS - SURFACE | 100,000 | 20 | 5.00 |
| PROVINCIAL ROADWAYS - GRADE | 100,000 | 40 | 2.50 |
| PROVINCIAL TRUNK HIGHWAYS - SURFACE | 100,000 | 20 | 5.00 |
| PROVINCIAL TRUNK HIGHWAYS - GRADE | 100,000 | 40 | 2.50 |
| AIRSTRIPS - GRADE | 100,000 | 40 | 2.50 |
| DAMS/WATER STRUCTURES | 100,000 | 40 | 2.50 |

For example, for a piece of machinery used for road construction costing \$30,000, the estimated annual amortization would be calculated as follows:

| | | | | |
|------------------------|---|--------------------|---|---------------------|
| <u>Historical Cost</u> | | <u>Useful Life</u> | | <u>Amortization</u> |
| \$30,000 | ÷ | 15 | = | \$2,000/year |
