Dividends paid by companies subject to the general tax rate will continue to be subject to a 38% gross-up and 8% Manitoba Dividend Tax Credit.

Eligible property includes Class 46 and Class 50 data processing equipment purchased, leased and made available for use in Manitoba after April 16, 2013 and before 2016.

For companies where the primary business activity, including the activities of its affiliates, is data processing, the tax credit rate will increase from 4% to 4.5% on the capital cost of new qualified property that is a building and from 7% to 8% on the capital cost of new qualified property that is machinery or equipment.

The maximum credit is set at \$12,000 per eligible rental unit.</p> <p>Eligible landlords can operate as a for-profit or not-for profit entity, but must be residents of Manitoba or have a permanent establishment in Manitoba. Eligible not-for-profit projects will receive a fully refundable tax credit in the year in which the tax credit is earned, as qualifying units are rented. The tax credit on for-profit projects will be claimable over a minimum of five years, and is non-refundable.</p> <p>Landlords are required to file an annual attestation for five years identifying the affordable units and the total new rental units constructed.</p>
Research and Development Tax Credit	<p>The 20% tax credit is being amended to protect the base from the changes to the federal Scientific Research and Experimental Development Tax Credit.</p> <p>Manitoba is adjusting the tax credit to maintain eligibility of capital in the Manitoba tax credit base when it is removed from the federal base. Contract payments to eligible institutes will remain eligible at 100% when all contract payments in the federal base are reduced to 80%.</p> <p>Manitoba will follow the federal changes to reduce the 65% prescribed proxy amount for overhead to 60% of direct labour costs in 2013 and to 55% starting in 2014.</p>
