

## Manitoba Chiropractors Association - Action Plan

In response to the recommendations made by the Fair Registration Practices Office, the Manitoba Chiropractors Association committed to the following action plan in June 2023:

Recommendation(s)	Action(s)	Anticipated Completion Date	Status Update
<p>1. Commit to providing fair consideration and assessment for internationally educated chiropractors trained in unrecognised chiropractic programs and provide clear and complete information about this possibility.</p>	<p>MCA commits to assessing applicants with unrecognised academic training, reviewing assessment policy to this end and revising MCA’s registration information.</p>	<p>Within three months</p>	<p>Complete</p>
<p>2. Work with the Canadian Examining Board of Canada to formalise the ability to share applicant documents whenever authorised by candidates.</p>	<p>MCA recognised the value in this and immediately reached out to CCEB to determine feasibility. There are steps, which must occur at CCEB — external of MCA — to allow for a change in their protocols that would capture candidate authorisation to release. CCEB indicates platform will take time — therefore in the interim, MCA is adding an authorisation section to the application form to allow candidate to direct that CCEB provide the transcript filed with CCEB directly to the MCA — CCEB has indicated that they will provide the information if written authorisation is received from candidate.</p>	<p>12 to 18 months – subject to CCEB moving ahead with discussed change of protocols.</p> <p>MCA Application form for interim measure within three months</p>	<p>Complete</p>

<p>3. With regard to labour mobility applications:</p> <ul style="list-style-type: none"> <li>• introduce clear, complete and website accessible information about the requirements and application process and form</li> <li>• remove the currency of practice requirement</li> <li>• remove the requirement for the third-party submission of academic transcripts and education credentials, whenever authorised by candidates.</li> </ul>	<p>MCA commits for mobility application streamlining where possible to remove both the currency requirement and the requirement for third-party submission of education documents. — To clarify, if there is a letter of good standing from another province, MCA will accept copies — additionally an interim measure for an applicant to authorise release from CCEB of their transcripts may be even more streamlined for the applicant rather than providing copies that they must prepare.</p> <p>MCA commits to website review and improvements to provide clear, complete and website accessible information about requirements and application process and application form.</p>	<p>Within three months</p>	<p>Complete</p>
