Subject: **Natural Gas Rebates**

We have now been advised that clients who register with a natural gas company broker to obtain a rebate will continue to have their gas distribution and billings through Centra Gas. Therefore, it will not be necessary to cancel the arrangements for the payment of these clients' utility costs as outlined in Directive 92/10.

When gas rebates are received by clients, they will be required to advise the Department of the amount received and it will be considered as unearned income.
