

Manitoba's FASD Strategy: 2024-2029 Results Map

A results map is a visual tool that helps people understand the ultimate goal of the FASD strategy, how we will get there, and the changes we expect to see.

A results map shows government and community partners what they can do to work together towards the ultimate goal.

How it works:

- 1) If we take key actions,
- 2) Then we expect to see positive system changes.
- 3) These changes will have positive results in people's lives.
- 4) These results will contribute to the ultimate goal: people with FASD, their families, and people impacted by substance use in pregnancy being healthier, more supported, and living the lives they want.

1. Key Actions:

- Messages are consistent, accurate, and promote dignity
- FASD information is created and shared across Manitoba
- Information is shared through strong partnerships
- Pregnant people can access addictions services when needed
- Services for pregnant people and parents who use substances are funded
- Manitobans can access education on healthy pregnancy and how to support pregnant people
- People with living experience help to guide FASD services
- More FASD training and resources are provided
- Service agencies are supported
- Funded programs are regularly evaluated
- Government and community partners work together more
- More connection to Indigenous services and cultural supports
- Indigenous partners provide regular feedback and guidance
- FASD diagnostic assessments are funded and available
- Public services are accessible and meet the needs of people with FASD
- Services are funded for people with FASD or possible FASD
- Services for parents, families, and caregivers are funded
- People in the justice system can access FASD services

2. Positive System Changes:

- There is less stigma about FASD

- More Manitobans are using FASD information and resources
- Pregnant people and parents have better access to programs and resources
- Manitobans have knowledge and support to reduce or stop alcohol use during pregnancy
- Indigenous-led support increases
- Service providers have stronger skills and tools to support people
- FASD diagnostic assessments are timely and accessible
- Services for people with FASD and their families are expanded

3. Positive Results in People's Lives:

- Manitobans know more about FASD and alcohol use in pregnancy
- Pregnant people and parents are healthier
- People impacted by FASD have better quality services
- People with FASD re-enter the justice system less often
- People with FASD and their families are better supported

4. Ultimate Goal:

- People impacted by FASD are healthier and more supported to live the lives they want
