

PART 3 EXCEPTION DRUG STATUS (EDS)

Certain drugs are approved for coverage under the Exception Drug Status (EDS) Program when they meet specific criteria and upon review and recommendation of the Manitoba Drug Standards and Therapeutics Committee (MDSTC). The drugs usually fall into one of the following categories:

- The drug is ordinarily administered only to hospital in-patients but is being administered outside of a hospital because of unusual circumstances.
- The drug is not ordinarily prescribed or administered in Manitoba, but is being prescribed because it is required in the diagnosis or treatment of an illness, disability, or condition rarely found in Manitoba.
- Evidence, including therapeutic and economic evidence, provided to the minister in accordance with the criteria established by him or her, supports a specific treatment regime which includes use of the drug or other item.

Over-the-counter (OTC) products are generally not included as benefits of the Drug Plan.

Exception Drug Status is not granted for appetite suppressants, drugs for the treatment of erectile dysfunction and vaccines normally provided by Public Health.

When an EDS drug is approved as a benefit, the cost will be covered through the Pharmacare Program during the time period authorized by the EDS Program and after the clients Pharmacare deductible has been met.

CHANGES TO APPROVAL PROCESS AND EXPIRY DATES - EFFECTIVE OCTOBER 2017

Effective October 1, 2017 many Part 3 drugs will no longer require EDS renewal for coverage under Manitoba's Provincial Drug Programs (PDP) and the Employment and Income Assistance Drug Program (EIA). All Part 3 EDS drugs will still require initial approval, but for many drugs, if coverage approval is granted, this approval will be indefinite and prescribers will no longer need to reapply for extending or renewing this coverage. Any patient that has an active EDS approval (as of October 1, 2017) for any of the drugs affected by this change will automatically have the approval extended indefinitely. This change will affect only products identified on the List of Designated Drugs and may be updated from time to time. Details can be found online at:

<https://www.gov.mb.ca/health/pharmacare/healthprofessionals.html>

INFORMATION REQUIRED WHEN MAKING A REQUEST FOR COVERAGE:

- Prescriber Information - Name (including first initial), Address, Phone Number and Prescriber Number.
- Client Information - Client Name, Address, Manitoba Health Registration Number (MHRN), Personal Health Identification Number (PHIN) and Date of Birth.
- Drug Information - Drug Name (trade and/or generic name), Dosage Form, Strength, Expected Dosing and Expected Therapy Duration.
- Justification - Diagnosis and/or Indications for Use.

EDS request forms are now available online, please visit:

<http://www.gov.mb.ca/health/pharmacare/healthprofessionals.html#b>

NOTES REGARDING THE EXCEPTION DRUG STATUS (EDS) PROGRAM:

- Duly licensed practitioners prescribing within their scope of practice may apply for EDS.
- Requests can be submitted by mail or by fax.
The fax number is (204) 942-2030 or 1-877-208-3588. These numbers are for health professionals only.
- To ensure eligible benefit coverage, approval must take place prior to purchase or dispensing of a prescription drug. Retroactive coverage is not provided, no exceptions.
- EDS requests are prioritized by date received and the urgency of the request.
- To ensure continuity of coverage, requests for renewal should be forwarded prior to the expiry date. Please allow at least one to two business days.
Urgent requests received during regular business hours will usually be processed within 24 hours.
- Patients are notified by letter if a request for coverage has been approved or denied.
- If a drug is approved for coverage under EDS, coverage is valid from the date of application to date of expiration.
- If denied, payment for the medication is the responsibility of the patient.
- For NEW requests - If a client meets Part 3 EDS criteria for one of the products identified in the List of Designated Drugs with Indefinite EDS Approval, benefit coverage will be granted indefinitely. The client will receive an initial approval letter which confirms indefinite EDS approval.
- For RENEWAL requests - If a client has an active EDS approval for a product identified in the List of Designated Drugs with Indefinite EDS Approval – as of October 1, 2017, this coverage will be grandfathered indefinitely; no renewal will be required. The client will not be sent a letter to confirm their continued EDS approval.
- If the request for benefit coverage is not approved, payment for the medication is the responsibility of the patient.

NOTE: Not all medications currently available on the market in Canada are benefits under the Manitoba Drug Benefits Formulary or under the EDS Program.

NOTE: Some private and extended health insurance providers require their clients to have the EDS approval before they agree to cover any part of the prescription cost. It is the clients' responsibility to contact their private drug plan directly for further information.

PRODUCT SELECTION:

In September 2001, F/P/T Health Ministers agreed to establish a single Common Drug Review for new drugs (chemical entities) submitted in Canada for coverage by F/P/T drug plans. Beginning September 2003, all new drugs are reviewed nationally through the CDR process, with expert advice and recommendations being provided by the Canadian Agency for Drugs and Technologies in Canada. The recommendations of CADTH are taken into consideration by each jurisdiction when making a listing decision.

CADTH recommendations are taken into account by the Manitoba Drug Standards and Therapeutics Committee who makes recommendations to the Minister of Health on drug products to be considered for benefit under the Pharmacare Drug Benefit Program.

Committee members provide recommendations on drug interchangeability and on the therapeutic and economic value of drug benefits.

For more information on the Manitoba Drug Formulary Review Process, please visit:
<http://www.gov.mb.ca/health/mdbif/review.html>

For more information on the Manitoba Drug Benefits and Interchangeability Formulary, please visit:
<http://www.gov.mb.ca/health/mdbif/>

PROVINCIAL DRUG PROGRAMS REVIEW PROCESS (SPECIAL CIRCUMSTANCES):

Should a prescriber wish to obtain EDS status for a drug not normally eligible for Part 3 EDS status, the prescriber may apply in writing and include the information listed below.

Please address request to:

Provincial Drug Programs Review Committee
 300 Carlton Street – Room 1015
 Winnipeg MB R3B 3M9
 Fax (204) 942-2030 or 1-877-208-3588

Please include all of the information required for an EDS request (see page 1) as well as:

- Information and background on the original EDS request.
- Previous therapies tried and response to those therapies.
- Additional Information such as supporting literature to support the review.

CRITERIA:

Following are the criteria for coverage of **common** drugs requested under Exception Drug Status. Further information can be provided by professional staff at the Exception Drug Status program.

ANTIHYPERTENSIVE/ANTILIPIDEMIC DRUGS

02411253 02411261 02411288 02411296 02411318 02411326 02411334 02411342	Apo-Amlodipine/ Atorvastatin	amlodipine/atorvastatin	5/10 mg 5/20 mg 5/40 mg 5/80 mg 10/10 mg 10/20 mg 10/40 mg 10/80 mg	Tablet
02273233 02273284 02273241 02273292 02273268 02273306 02273276 02273314	Caduet	amlodipine/atorvastatin	5/10 mg 10/10 mg 5/20 mg 10/20 mg 5/40 mg 10/40 mg 5/80 mg 10/80 mg	Tablet

02311283 02311291 02311305 02311313	ratio-Rivastigmine	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule
02324563 02324571 02324598 02324601	Sandoz Rivastigmine	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule

Confirmed diagnosis of Alzheimer's Disease with DSMIV criteria with:

(a) Memory impairment (impaired ability to learn new information or to recall previously learned information); plus

(b) at least one of the following:

- Aphasia; problems with language (receptive and expressive)
- Apraxia; impaired ability to carry out motor activities despite intact motor function
- Agnosia; failure of recognition - especially people
- Disturbance in executive functioning

The above deficits must have:

- Caused significant decline in previous levels; and
- A gradual onset and continued cognitive decline; and
- The absence of other causative conditions; and
- The deficits do not occur exclusively during the course of delirium; and
- Normal test results for all of the following values: CBC, TSH, Electrolytes, Vitamin B12, and Glucose; and
- The initial MMSE score must be between 10 and 26 and measured within 30 days of the application.

02423596	Incruse Ellipta	umeclidinium	62.5 mcg	Inhaler
02394936	Seebri Breezhaler	glycopyrronium	50 mcg	Powder for Inhalation
02246793	Spiriva	tiotropium	18 mcg	Capsule
02435381	Spiriva Respimat	tiotropium	2.5 mcg/dose	Inhaler
02409720	Tudorza Genuair	aclidinium	400 mcg	Inhaler

For patients with moderate to severe COPD who remain symptomatic despite an adequate trial (3 months) of ipratropium.

02418401	Anoro Ellipta	umeclidinium/vilanterol	62.5/25 mcg	Powder for Inhalation
02439530	Duaklir Genuair	aclidinium/formoterol	400 mcg/12 mcg	Inhaler
02441888	Inspiroto Respimat	olodaterol/tiotropium	2.5 mcg/2.5 mcg	Inhaler
02418282	Ultibro Breezhaler	indacaterol/glycopyrronium	110/50 mcg	Inhaler

For patients with moderate to severe COPD who remain symptomatic despite an adequate trial (3 months) of a long acting bronchodilator.

Note: Should not be used in combination with another LAAC or LABA

Please contact the EDS Program at Manitoba Health for specific criteria.

02316986	Xarelto	rivaroxaban	10 mg	Tablet
----------	----------------	-------------	-------	--------

For the prophylaxis of venous thromboembolism following total knee replacement for up to two (2) weeks, and following total hip replacement surgery for up to five (5) weeks, as an alternative to low molecular weight heparins.

02378604 02378612	Xarelto	rivaroxaban	15 mg 20 mg	Tablet
----------------------	----------------	-------------	----------------	--------

For the treatment of deep vein thrombosis (DVT) and pulmonary embolism (PE) for a duration of up to six months.

Exclusions:

- Patients with clinically significant active bleeding, such as gastrointestinal bleeding, including that associated with hemorrhagic manifestations, bleeding diathesis, spontaneous impairment of hemostasis or patients with spontaneous impairment of hemostasis.
- Patients with severe renal impairment (CrCl < 30 mL/min).

02377233 02397714	Eliquis	apixaban	2.5 mg 5 mg	Tablet
02458640 02458659 02458667	Lixiana	edoxaban	15 mg 30 mg 60 mg	Tablet
02312441 02358808	Pradaxa	dabigatran	110 mg 150 mg	Capsule
02378604 02378612	Xarelto	rivaroxaban	15 mg 20 mg	Tablet

At-risk patients with non-valvular atrial fibrillation for the prevention of stroke and systemic embolism AND in whom:

- (a) Anticoagulation is inadequate following a reasonable trial on warfarin; **OR**
- (b) Anticoagulation with warfarin is contraindicated or not possible due to inability to regularly monitor via International Normalized Ratio (INR) testing (i.e. no access to INR testing services at a laboratory, clinic, pharmacy, and at home).

02377233	Eliquis	apixaban	2.5 mg	Tablet
----------	----------------	----------	--------	--------

For the prophylaxis of venous thromboembolism (VTE) following elective total hip replacement surgery or elective total knee replacement surgery, where the initial post-operative doses are administered in an acute care (hospital) setting.

02377233 02397714	Eliquis	apixaban	2.5 mg 5 mg	Tablet
02458640 02458659 02458667	Lixiana	edoxaban	15 mg 30 mg 60 mg	Tablet

For the treatment of venous thromboembolic events (VTE) (deep vein thrombosis [DVT] and pulmonary embolism [PE]), and the prevention of recurrent DVT and PE for a duration of up to six months.

CENTRAL NERVOUS SYSTEM AGENTS

Anorexigenic Agents and Respiratory and Cerebral Stimulants

02239665	Alertec	modafinil	100 mg	Tablet
02285398	Apo-Modafinil	modafinil	100 mg	Tablet
02430487	Auro-Modafinil	modafinil	100 mg	Tablet
02432560	Mar-Modafinil	modafinil	100 mg	Tablet
02420260	Teva-Modafinil	modafinil	100 mg	Tablet

1. To **treat narcolepsy** where:
 - (a) Amphetamines are contraindicated; OR
 - (b) Patients over 40 years old who have underlying cardiovascular disease or history of the disease; OR
 - (c) Patients have Parkinson's Disease or are unresponsive to methylphenidate (Ritalin) or dexamphetamine.
2. To treat patients with sleep lab confirmed diagnosis of narcolepsy, or idiopathic CNS hypersomnia.
3. To treat Multiple Sclerosis fatigue not responding to amantadine.

Anticonvulsants

02284294 02284308 02284316	Apo-Oxcarbazepine	oxcarbazepine	150 mg 300 mg 600 mg	Tablet
02242067 02242068 02242069	Trileptal	oxcarbazepine	150 mg 300 mg 600 mg	Tablet
02244673	Trileptal	oxcarbazepine	60 mg/mL	Liquid

- For the treatment of patients with refractory partial epilepsy;
- (a) when intolerant to other anticonvulsant therapy;
 - (b) adjunct therapy when current anticonvulsant therapies are not providing adequate seizure control.

02247027 02247028 02247029	Keppra	levetiracetam	250 mg 500 mg 750 mg	Tablet
02285924 02285932 02285940	Apo-Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02375249 02375257 02375265	Auro-Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02274183 02274191 02274205	CO Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet

02403005 02403021 02403048	Jamp-Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02399776 02399784 02399792	Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02353342 02353350 02353369	Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02454653 02454661 02454688	Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02442531 02442558 02442566	Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02296101 02296128 02296136	pms-Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02440202 02440210 02440229	NAT-Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02396106 02396114 02396122	Ran-Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet
02461986 02461994 02462001	Sandoz Levetiracetam	levetiracetam	250 mg 500 mg 750 mg	Tablet

As an add-on anticonvulsant or for control of pain where initiated by a pain clinic and where other similar agents have failed e.g. gabapentin, lamotrigine, valproic acid, or topiramate.

02426862 02426870 02426889 02426897	Aptiom	eslicarbazepine	200 mg 400 mg 600 mg 800 mg	Tablet
02452936 02452944 02452952 02452960 02452979	Brivlera	brivaracetam	10 mg 25 mg 50 mg 75 mg 100 mg	Tablet
02404516 02404524 02404532 02404540 02404559 02404567	Fycompa	perampanel	2 mg 4 mg 6 mg 8 mg 10 mg 12 mg	Tablet
02357615 02357623 02357631 02357658	Vimpat	lacosamide	50 mg 100 mg 150 mg 200 mg	Tablet

For use as an adjunctive therapy in patients in the management of refractory partial-onset seizures (POS) in adult patients with epilepsy who are not satisfactorily controlled with conventional therapy and who meet all of the following criteria:

- (a) are under the care of a physician experienced in the treatment of epilepsy,
- (b) are currently receiving two or more antiepileptic drugs, and
- (c) in whom all other antiepileptic drugs are ineffective or not appropriate

Non-Steroidal Anti-Inflammatory Agents				
02248973 02248974	Apo-Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02390884 02390892	Auro-Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02250012 02250020	CO Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02353148 02353156	Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02255987 02255995	Mylan-Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02242785 02242786	Mobicox	meloxicam	7.5 mg 15 mg	Tablet
02258315 02258323	Teva-Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02248267 02248268	pms-Meloxicam	meloxicam	7.5 mg 15 mg	Tablet
02247889 02248031	ratio-Meloxicam	meloxicam	7.5 mg 15 mg	Tablet

For the **long-term treatment of osteoarthritis or rheumatoid arthritis** in patients who have one or more of the following risk factors:

- Previous peptic ulcer, gastrointestinal bleeding, gastric outlet obstruction (endoscopy or radiographic evidence);
- Elderly (more than 65 years of age);
- Concurrent warfarin therapies;
- Bleeding disorders;
- Concurrent prednisone therapy at doses greater than 5 mg/day for more than 2 weeks; OR
- Where at least 3 NSAID's have been tried and failed or were not tolerated.

Also may approve for ankylosing spondylitis, gout, pseudo-gout, lupus or psoriatic arthritis.

NOTE: *If a patient is receiving a proton pump inhibitor (PPI) for reflux disease, COX II inhibitors are not warranted for additional protection.*

Opiate Agonists				
02230302 02163748 02163780 02163799	Codeine Contin	codeine	50 mg 100 mg 150 mg 200 mg	Sustained Release Tablet

For the treatment of:

(a) **Palliative and chronic pain** in patients where hepatotoxicity is a concern due to high doses of acetaminophen (e.g. taking over 12 tablets of acetaminophen compound with codeine 30 mg per day).

(b) **Codeine addiction** using tapering doses.

02231934 02240131 02240132	Oxy-IR	oxycodone HCl	5 mg 10 mg 20 mg	Tablet
02319977 02319985 02319993	pms-Oxycodone	oxycondone HCl	5 mg 10 mg 20 mg	Tablet
00789739 00443948 02262983	Supeudol	oxycodone HCl	5 mg 10 mg 20 mg	Tablet
00392480 00392472	Supeudol	oxycodone HCl	10 mg 20 mg	Suppositories

Patients who have tried the combination products (e.g. Percocet) and have maximized the acetaminophen dose or have contraindications to acetaminophen.

02372525 02372533 02372797 02372541 02372568 02372576 02372584	OxyNeo	oxycodone	10 mg 15 mg 20 mg 30 mg 40 mg 60 mg 80 mg	Controlled Released Tablet
--	---------------	-----------	---	-------------------------------

For the diagnosis of:

1. Cancer related pain; PLUS

Patients who are unable to tolerate or receive an adequate response to either the regular release dosage forms of oxycodone or the sustained release preparations of morphine or hydromorphone; OR

2. Pain management in a specified chronic pain diagnosis (details regarding patient's condition and previous medication history are required); PLUS

Patients who are unable to tolerate or receive an adequate response to either the regular release dosage forms of oxycodone or the sustained release preparations of morphine or hydromorphone.

Selective Serotonin and Norepinephrine Reuptake Inhibitors				
02420864 02420872	Abilify Maintena	aripiprazole	300 mg/vL 400 mg/vL	Injection
02354217 02354225 02354233 02354241	Invega Sustenna	paliperidone	50 mg/0.5 mL 75 mg/0.75 mL 100 mg/mL 150 mg/1.5 mL	Injection
02455943 02455986 02455994 02456001	Invega Trinza	paliperidone	175 mg/0.875 mL 263 mg/1.315 mL 350 mg/1.75 mL 525 mg/2.625 mL	Injection
02298465 02255707 02255727 02255758	Risperdal Consta	risperidone	12.5 mg 25 mg 37.5 mg 50 mg	Injection

For patients with schizophrenia:

- (a) With a history of non-adherence, as evidenced by outcomes such as repeated hospitalizations, or
- (b) Who have tried one or more antipsychotic agents, and who continue to be inadequately controlled, or are experiencing significant side effects such as EPS.

NOTE: Invega Trinza to be used only after Invega Sustenna has been established as adequate treatment for at least four months.

ELECTROLYTIC, CALORIC AND WATER BALANCE

02242814	Apo-Lactulose	lactulose	667 mg/mL	Oral Liquid
02247383	Euro-LAC	lactulose	667 mg/mL	Oral Liquid

Portal systemic encephalopathy.

02410702	Zaxine	rifaximin	550 mg	Tablet
----------	---------------	-----------	--------	--------

For reducing the risk of overt hepatic encephalopathy (HE) recurrence (i.e. 2 or more episodes), if the following clinical criteria are met:

- (a) Patients are unable to achieve adequate control of HE recurrence with maximal tolerated dose of lactulose alone;
- (b) Must be used in combination with a maximal tolerated dose of lactulose;
- (c) For patients not maintained on lactulose, information is required regarding the nature of the patient's intolerance to lactulose.

EYE, EAR, NOSE AND THROAT PREPARATIONS

For the treatment of patients with type 2 diabetes who have previously been treated with metformin and a sulfonylurea. Should be used in patients with diabetes who are not adequately controlled on or are intolerant to metformin and a sulfonylurea, and for whom insulin is not an option.

02443937 02443945	Jardiance	empagliflozin	10 mg 25 mg	Tablet
----------------------	------------------	---------------	----------------	--------

As an adjunct to diet, exercise, and standard care therapy to reduce the incidence of cardiovascular (CV) death in patients with type 2 diabetes mellitus (T2DM) and established cardiovascular disease who have inadequate glycemic control, if the following criteria are met:

- Patients have inadequate glycemic control despite an adequate trial of metformin
- Patients have established cardiovascular disease as defined* in the EMPA-REG OUTCOME trial.

***NOTE:** Established CV disease is defined on the basis of one of the following:

- History of myocardial infarction (MI).
- Multi-vessel coronary artery disease in two or more major coronary arteries (irrespective of revascularization status).
- Single-vessel coronary artery disease with significant stenosis and either a positive non-invasive stress test or discharged from hospital with a documented diagnosis of unstable angina within 12 months prior to selection.
- Last episode of unstable angina > 2 months prior with confirmed evidence of coronary multi-vessel or single-vessel disease.
- History of ischemic or hemorrhagic stroke.
- Occlusive peripheral artery disease.

02449935 02449943	Xigduo	dapagliflozin/metformin	5/850 mg 5/1000 mg	Tablet

For type 2 diabetic patients who have been titrated to a stable combination, for a minimum of at least 3 months, of the separate components, Metformin and Linagliptin/Saxagliptin/Sitagliptin/Dapagliflozin, and for whom insulin is not an option.

02435462 02435470	Forxiga	dapagliflozin	5 mg 10 mg	Tablet
----------------------	----------------	---------------	---------------	--------

For the treatment of patients with type 2 diabetes.

1. Added on to metformin for patients:
 - (a) Who have inadequate glycemic control on metformin;
 - (b) Who have a contraindication or intolerance to a sulfonylurea;
 - (c) For whom insulin is not an option.
2. Added on to a sulfonylurea for patients
 - (a) Who have inadequate glycemic control on a sulfonylurea;
 - (b) Who have a contraindication or intolerance to metformin;
 - (c) For whom insulin is not an option.

For the treatment of **Paget's Disease**.

02343541	Prolia	denosumab	60 mg/mL	Injection
----------	---------------	-----------	----------	-----------

To increase bone mass in men or postmenopausal women with osteoporosis who are at a high risk for fracture or who have failed or are intolerant to other available osteoporosis therapy, where the following clinical criteria are met:

High fracture risk defined as either:

- moderate 10-year fracture risk (10% to 20%) as defined by either the Canadian Association of Radiologists and Osteoporosis Canada (CAROC) tool or the World Health Organization's Fracture Risk Assessment (FRAX) tool with a prior fragility fracture;

OR

- high 10-year fracture risk ($\geq 20\%$) as defined by either the Canadian Association of Radiologists and Osteoporosis Canada (CAROC) tool or the World Health Organization's Fracture Risk Assessment (FRAX) tool.

AND

Contraindication to oral bisphosphonates.

Notes:

- Bisphosphonate failure will be defined as a fragility fracture and/or evidence of a decline in bone mineral density below pre-treatment baseline levels, despite adherence for one year.
- Contraindication to oral bisphosphonates will be considered. Contraindications include renal impairment, hypersensitivity, and abnormalities of the esophagus (e.g. esophageal stricture or achalasia).

02269198	Aclasta	zoledronic acid	5 mg/100 mL	Injection

- (a) Psoriasis resistant to topical treatments (steroids, coal tar), systemic retinoids, MTX, hydroxyurea, PUVA, UVB treatment.
- (b) Rheumatoid arthritis.
- (c) Pediatric nephrotic syndrome.
- (d) Vasculitis failing other therapies such as steroids, Imuran.
- (e) Aplastic anemia.
- (f) Inflammatory bowel disease.
- (g) Where prescribed by a neurologist for the treatment of myasthenia gravis refractory to azathioprine, with or without steroids or where azathioprine is contraindicated.

NOTE: TRANSPLANT patients are covered under the WRHA Hospital Insured Program at HSC Psychiatry Pharmacy, phone number (204) 787-7440.

02436841	Entyvio	vedolizumab	300 mg/vL	Injection
----------	----------------	-------------	-----------	-----------

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had an inadequate response to conventional therapy including 5-aminosalicylate compounds, corticosteroids and immunomodulators AND
 For the treatment of patients over 18 years of age with moderate to severely active Crohn's Disease and/or Fistulating Crohn's Disease in patients refractory or with contraindications to an adequate course of 5-aminosalicylic acid and corticosteroids and/or other immunosuppressive therapy.

Request for coverage must be made by a specialist in gastroenterology.

02402475 02282097	Orencia	abatacept	125 mg/mL 250 mg/vial	Injection
----------------------	----------------	-----------	--------------------------	-----------

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis and who have failed treatment with at least 3 DMARDs (disease-modifying antirheumatic drugs) therapies one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.
 One combination therapy of DMARDs must also be tried.

Request for coverage must be made by a specialist in rheumatology.

02455323 02455331	Brenzys	etanercept	50 mg/mL	Injection
----------------------	----------------	------------	----------	-----------

Rheumatoid Arthritis:

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. □

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Brenzys or Erelzi will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Rheumatoid Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to therapy.

Ankylosing Spondylitis:

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Brenzys or Erelzi will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Ankylosing Spondylitis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to therapy.

02462869 02462877 02462850	Erelzi	etanercept	50 mg/mL 25mg/0.5mL 50mg/mL	Injection
----------------------------------	---------------	------------	-----------------------------------	-----------

Rheumatoid Arthritis:

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. □

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Erelzi or Brenzys will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Rheumatoid Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to therapy.

Ankylosing Spondylitis:

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Erelzi or Brenzys will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Ankylosing Spondylitis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to therapy.

Polyarticular Juvenile Idiopathic Arthritis:

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 4 years of age or older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

New requests for the treatment of Polyarticular Juvenile Idiopathic Arthritis for etanercept-naïve patients weighing 63 kg (138 pounds) or more will be assessed for coverage with Erelzi.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to therapy.

Psoriatic Arthritis:

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least DMARD 3 therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Erelzi will be the preferred etanercept option for all etanercept-naïve patients prescribed an etanercept product for Psoriatic Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naïve patients.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to therapy.

----------------------	---------------	------------	-------------------	-----------

Rheumatoid Arthritis:

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Brenzys or Erelzi will be the preferred etanercept option for all etanercept-naïve patients prescribed an etanercept product for Rheumatoid Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naïve patients.

Patients will not be permitted to switch from Enbrel to another etanercept product or vice versa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Psoriatic Arthritis:

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARD’s must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Ankylosing Spondylitis:

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Brenzys or Erelzi will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Ankylosing Spondylitis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Enbrel to another etanercept product or vice versa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Psoriasis:

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) > 10%
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 3 months. For continued coverage the physician must confirm the patient’s response to treatment and demonstration of treatment clinical benefits:

- ≥ 50% reduction in the PASI score with ≥ 5 point improvement in the DLQI
- ≥ 75 % reduction in the PASI score
- ≥ 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

02258595	Humira	adalimumab	40 mg/0.8 mL	Injection
----------	---------------	------------	--------------	-----------

Crohn’s Disease:

For treatment of moderate to severely active Crohn's Disease and/or Fistulizing Crohn’s Disease in patients refractory or with contraindications to an adequate course of 5-aminosalicylic acid and corticosteroids and other immunosuppressive therapy.

Request for coverage must be made by a specialist in gastroenterology.

Rheumatoid Arthritis:

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Psoriatic Arthritis:

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Ankylosing Spondylitis:

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Psoriasis:

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Polyarticular Juvenile Idiopathic Arthritis:

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Ulcerative Colitis:

For the treatment of adult patients with moderately to severely active colitis who have had an inadequate response to conventional therapy including 5-aminosalicylate compounds, corticosteroids and immunomodulators.

Request for coverage must be made by a specialist in gastroenterology.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment

----------	----------------	----------	-----------	-----------

Rheumatoid Arthritis:

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. □

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

02470373	Renflexis	infliximab	100 mg	Injection
----------	------------------	------------	--------	-----------

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Renflexis or Inflectra will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Rheumatoid Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Renflexis or Inflectra to another infliximab product or vice versa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARD must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Renflexis or Inflectra will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Psoriatic Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Renflexis or Inflectra to another infliximab product or vice versa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Renflexis or Inflectra will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Ankylosing Spondylitis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Renflexis or Inflectra to another infliximab product or vice versa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Psoriasis

For the treatment of adult patients with severe plaque psoriasis with one or more of the following:

- Psoriasis Area and Severity Index (PASI) ≥ 10 ;
- Body Surface Area (BSA) > 10 percent;
- Dermatology Life Quality Index (DLQI) > 10 ;
- Significant involvement of the face, hands, feet or genital region; AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

The initial request is approved for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

≥ 50 percent reduction in the PASI score with ≥ 5 point improvement in the DLQI; OR

≥ 75 percent reduction in the PASI score; OR

≥ 50 percent reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Renflexis or Inflectra will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Psoriasis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Renflexis or Inflectra to another infliximab product or vice versa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Crohn's Disease

For the treatment of patients with moderate to severely active Crohn's Disease and/or Fistulating Crohn's Disease in patients refractory or with contraindications to an adequate course of 5-aminosalicylic acid and corticosteroids and/or other immunosuppressive therapy.

Request for coverage must be made by a physician who is a specialist in gastroenterology.

For adults: Renflexis or Inflectra will be the preferred infliximab option for all infliximab-naïve adult patients prescribed an infliximab product for Crohn's Disease.

For pediatrics: Renflexis will be the preferred infliximab option for all infliximab-naïve pediatric patients prescribed an infliximab product for Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients. Patients will not be permitted to switch from Renflexis or Inflectra to another infliximab product or viceversa, if:

- 1. Previously trialed and deemed unresponsive to therapy.***

Ulcerative Colitis

For the treatment of patients with moderately to severely active ulcerative colitis who have had an inadequate response to conventional therapy including 5-aminosalicylate compounds, corticosteroids and immunomodulators.

Request for coverage must be made by a specialist in gastroenterology.

For adults: Renflexis or Inflectra will be the preferred infliximab option for all infliximab-naïve adult patients prescribed an infliximab product for Ulcerative Colitis.

For pediatrics: Renflexis will be the preferred infliximab option for all infliximab-naïve pediatric patients prescribed an infliximab product for Ulcerative Colitis.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-

naïve patients. Patients will not be permitted to switch from Renflexis or Inflectra to another infliximab product or vice versa, if:

1. Previously trialed and deemed unresponsive to therapy.

02419475	Inflectra	infliximab	100 mg/vL	Injection
----------	------------------	------------	-----------	-----------

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Inflectra or Renflexis will be the preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Rheumatoid Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if:

1. Previously trialed and deemed unresponsive to therapy.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARD must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

02241927	Rituxan	rituximab	10 mg/mL	Injection
----------	----------------	-----------	----------	-----------

Rheumatoid Arthritis:

For the treatment of severely active rheumatoid arthritis (RA), in combination with methotrexate, for patients who have failed to respond to an adequate trial of one or more anti-tumor necrosis factor (anti-TNF) agents (monoclonal antibody OR fusion protein) OR who are contraindicated to anti-TNF agents.

Request for coverage must be made by a specialist in rheumatology.

As induction-remission therapy for patients with severely active Granulomatosis with Polyangiitis (GPA) and Microscopic Polyangiitis (MPA) in whom the use of cyclophosphamide has failed; or the use of cyclophosphamide is not appropriate.

02424770	Actemra	tocilizumab	162 mg/0.9 mL	Injection
----------	----------------	-------------	---------------	-----------

Rheumatoid Arthritis:

For the treatment of adult patients who have moderate to severe active rheumatoid arthritis and who:

- (i) failed treatment with at least 3 DMARD (disease-modifying antirheumatic drugs) therapies, one of which therapies must be either methotrexate or leflunomide, unless intolerance or contraindication to these therapies is documented; and
- (ii) previously tried at least one combination of DMARD therapies.

Request for coverage must be made by a specialist in rheumatology.

Giant Cell Arteritis (GCA):

For treatment of Giant Cell Arteritis (GCA) in adult patients where the following criteria are met:

- At initiation of therapy, or with relapse, patients should be receiving prednisone.
- Duration of therapy with tocilizumab should be limited to 52 weeks per treatment course.

Patients should be under the care of a physician with the experience of diagnosis and management of GCA.

02350092	Actemra	tocilizumab	80 mg/4 mL	Injection
02350106			200 mg/10 mL	
02350114			400 mg/20 mL	

Rheumatoid Arthritis:

For the treatment of adult patients who have moderate to severe active rheumatoid arthritis and who:

- (i) failed treatment with at least 3 DMARD (disease-modifying antirheumatic drugs) therapies, one of which therapies must be either methotrexate or leflunomide, unless intolerance or contraindication to these therapies is documented; and
- (ii) previously tried at least one combination of DMARD therapies.

Request for coverage must be made by a specialist in rheumatology.

Systemic Juvenile Idiopathic Arthritis:

For the treatment of active systemic juvenile idiopathic arthritis (sJIA) in patients 2 years of age and older who:

- (i) have responded inadequately to previous therapy with one or more non steroidal anti-inflammatory drugs; and
- (ii) who have responded inadequately to previous therapy with one or more systemic corticosteroids.

Polyarticular Juvenile Idiopathic Arthritis:

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Psoriatic Arthritis:

For the treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARD must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Ankylosing Spondylitis:

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least 3 different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

02320673 02320681	Stelara	ustekinumab	45 mg/0.5 mL 90 mg/mL	Injection
----------------------	----------------	-------------	--------------------------	-----------

Psoriasis:

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) > 10%
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 3 months. For continued coverage the

physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- ≥ 50% reduction in the PASI score with ≥ 5 point improvement in the DLQI
- ≥ 75 % reduction in the PASI score
- ≥ 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

02438070	Cosentyx	secukinumab	150 mg/mL	Injection
----------	-----------------	-------------	-----------	-----------

Psoriasis:

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) > 10%
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 3 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- ≥ 50% reduction in the PASI score with ≥ 5 point improvement in the DLQI
- ≥ 75 % reduction in the PASI score
- ≥ 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Psoriatic Arthritis (PsA):

For the treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Ankylosing Spondylitis (AS):

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least 3 different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

(a) Treatment of severe acne - refractory to birth control pills, topicals (vitamin A/acid gel, tretinoins), Accutane and antibiotics.

(b) Hirsutism not responding to standard therapy (e.g. birth control pills, spironolactone, metformin).

02408163	Fibristal	uliprostal	5 mg	Tablet
----------	------------------	------------	------	--------

For the treatment of moderate to severe signs and symptoms of uterine fibroids in adult women of reproductive age, who are eligible for surgery under the following conditions:

(a) The duration of treatment will not exceed three (3) months, per patient, per lifetime;

(b) The patient is under the care of a physician experienced in the management of gynecological conditions such as uterine fibroids.

01968017	Neupogen	filgrastim	0.3 mg/mL	Injection
----------	-----------------	------------	-----------	-----------

For the use in patients with HIV infection for the prevention and treatment of neutropenia to maintain a normal absolute neutrophil count (ANC).

Grastofil will be the preferred filgrastim option for all filgrastim-naive patients. Preferred means the first infliximab product to be considered for reimbursement for filgrastim-naive patients.

02441489	Grastofil	filgrastim	300 mcg/0.5 mL	Injection
----------	------------------	------------	----------------	-----------

For the use in patients with HIV infection for the prevention and treatment of neutropenia to maintain a normal absolute neutrophil count (ANC).

Grastofil will be the preferred filgrastim option for all filgrastim-naive patients. Preferred means the first infliximab product to be considered for reimbursement for filgrastim-naive patients.

02387174	Dificid	fidaxomicin	200 mg	Tablet
----------	----------------	-------------	--------	--------

For the treatment of patients:

- (a) in place of vancomycin if there is a documented allergy to vancomycin; or
- (b) as an alternative to vancomycin if a patient experiences a “severe adverse reaction” to vancomycin therapy; or
- (c) treatment that results in the discontinuation of vancomycin;
- (d) as an alternative to vancomycin if a patient experiences a 'severe intolerance' to vancomycin treatment that results in the discontinuation of vancomycin therapy; or
- (e) for use in the event of vancomycin treatment failure.

In addition to the above, for use in prior Clostridium Difficile Infection (CDI) situations after other current CDI treatment options fail.

02393751	Esbriet	pirfenidone	267 mg	Capsule
02464489 02464500	Esbriet	pirfenidone	267 mg 801 mg	Tablet
