

Information for Pharmacists

**Claims Submission Procedure –
Carbamazepine 100mg/5mL Suspension**

Effective March 30, 2026

Please include this Procedure in your Drug Programs Information Network (DPIN) Manual under Section 4: Claims Submission.

****Pharmacies do NOT receive drug interaction information when submitting claims using PINs. Please review all claims carefully prior to submitting****

- There is variable supply of commercially available Carbamazepine 100mg/5mL suspension. The following products are noted as being “short”:
 - Tegretol 100mg/5mL Suspension (DIN: 02194333)
 - Taro-Carbamazepine 100mg/5mL suspension (DIN: 02367394)
- Due to this shortage, Manitoba is outlining the following product selection tree. This selection tree is to encourage pharmacy providers to use existing commercial supply while outlining an alternative option if supply is unavailable:
 - Commercially available product should be dispensed if the pharmacy has inventory on hand or can obtain product through normal distribution channels;
 - The pharmacy vendor may obtain commercially available product from another provider (e.g., another member within the same chain);
 - If commercially available product cannot be obtained, then obtain a compounded version of the product and follow the Claims Submission Procedure – Outsourced Extemporaneous Products (Compounding) found at http://www.gov.mb.ca/health/pharmacare/profdocs/csp_oep.pdf.
- The following PIN should be used when submitting claims for Compounded Carbamazepine 100mg/5mL suspension:

PIN: 00912009
- Manitoba will inform pharmacy providers once the shortage has been resolved and the PIN is no longer required and has been withdrawn for coverage.
