Resource 3: Temperature Log for Vaccines and Biologics

Provider ___________________________________________________________  Month ____________________

Completing the Temperature Log:

1. Twice each working day record the time, staff initials, room temperature and place an "X" in the box that corresponds with the current refrigerator temperature where product is stored.
2. Check the min/max temperatures on the thermometer and indicate them on the log by writing “min” and “max” in the corresponding temperature box.

If any of the recorded temperatures are in the shaded zones: This represents an unacceptable temperature range and a cold chain failure has occurred. Immediate action is needed!

**ACTION:** Contact the person at your site who is responsible for vaccine storage and handling.
