

PARENT CHILD COALITIONS

- Parent child coalitions bring together parents, early childhood educators, educators, health care professionals and other community organizations to plan and work collaboratively to support the healthy development of children aged prenatal to 6 years, with a priority focus on 1 to 4 years. Research shows that experience-based brain development in the early years affects learning, behaviour and health throughout the life course (The Early Years Study, 1999).
- Parent child coalitions support existing community programs for families with young children and develop new initiatives that reflect each community's diversity and strengths. Coalition partners encourage a broad range of services and programming for children aged prenatal to 6 years, with a priority focus on 1 to 4 years, and their families, based on the core pillars of positive parenting, nutrition and physical health, literacy and learning and community capacity.
- Recognizing that parents are the first, most important and most lasting teachers in a child's life, coalition activities create opportunities for parents and children to participate in quality programming together, and offer supports to families.
- Healthy Child Manitoba supports regional parent child coalitions within geographic boundaries, based on the Regional Health Authority Boundaries and Winnipeg Community Areas.
- There are 26 funded parent child coalitions province-wide: 25 regional coalitions (12 regions outside Winnipeg and 13 community areas within Winnipeg) and 1 cultural organization that serves the needs of Francophone communities.
