

SUPPORT SERVICE PROVIDER LIST
DEPARTMENT OF HOUSING, ADDICTIONS AND HOMELESSNESS

Manitoba Housing recognizes that housing developers may not have the expertise or connections to service providers required to incorporate support services into their projects. To address this gap, the department has compiled a list of non-profit agencies, interested in partnering with housing developers to deliver support services, through an expression of interest process.

This list includes a brief description of each provider, the geographical areas in which they operate and the levels of services they are interested in delivering. Please note inclusion on the list does not represent a comprehensive assessment of a service provider’s capacity or qualifications, nor does it represent a funding commitment, now or in the future. Housing developers and partnering agencies are expected to conduct their own due diligence when partnering with service providers.
