

Community Initiatives

What is available?

The Community Initiatives Program supports projects that have a broad impact on Winnipeg's inner city or target specific groups across the inner city. It funds activities that enhance economic development, increase safety and prevent crime, reduce at risk behaviour, contribute to better health practices, strengthen tenant-landlord relations and improve coordination and cooperation.

Where is the program available?

An initiative under this program must involve more than one inner city neighbourhood in Winnipeg and can include inner city neighbourhoods not currently designated by Neighbourhoods Alive.

Who can apply?

Applicants must be community organizations whose overall purpose is to improve the quality of life in Winnipeg's inner city.

What kinds of initiatives are eligible?

Funding is variable and depends on the scale and anticipated results of the proposed project.

What is the application process?

Organizations will prepare proposals in consultation with the Province's Neighbourhoods Alive! Manager. Recipients will be required to enter into an agreement with Manitoba on the expenditure of funds. The agreement will specify requirements for reporting and audit.

The Neighbourhoods Alive! manager coordinates the program with other government programs and provides assistance to neighbourhood organizations in accessing those programs.

Are there specific dates for submitting proposals?

Community Initiatives intake dates are April 15 and October 15 of every year. Applications received after these dates will not be reviewed until the following intake period.
