## Pest Control

Manitoba Housing strives to provide clean, comfortable properties. Achieving this goal includes the prevention and control of pests. This goal requires cooperation between Manitoba Housing and our tenants.

Tenants are required to report all possible pest problems to Manitoba Housing as soon as possible which will help limit the growth or spread of pests.

Manitoba Housing provides tenants with notice prior to entering a home to perform pest management control. Tenants are asked to prepare the home for scheduled treatments.

Tenants are encouraged to speak with Manitoba Housing staff where there are concerns or questions about pest control issues or treatments.

-----  
If you have questions about any of the above information please contact your Property Manager or Tenant Services Coordinator.

Available in alternate format on request.
