

REPORT OF ACTIVITIES 2008

**Manitoba Science, Technology, Energy and Mines
Manitoba Geological Survey**

Every possible effort is made to ensure the accuracy of the information contained in this report, but Manitoba Science, Technology, Energy and Mines does not assume any liability for errors that may occur. Source references are included in the report and users should verify critical information.

Any digital data and software accompanying this publication are supplied on the understanding that they are for the sole use of the licensee, and will not be redistributed in any form, in whole or in part, to third parties. Any references to proprietary software in the documentation and/or any use of proprietary data formats in this release do not constitute endorsement by Manitoba Science, Technology, Energy and Mines of any manufacturer's product.

When using information from this publication in other publications or presentations, due acknowledgment should be given to the Manitoba Geological Survey. The following reference format is recommended:

Manitoba Science, Technology, Energy and Mines 2008: Report of Activities 2008; Manitoba Science, Technology, Energy and Mines, Manitoba Geological Survey, 189 p.

Cover photo: MGS geologist Scott Anderson examining an outcrop of mafic-ultramafic volcanoclastic rocks, Knee Lake. Despite regional deformation, this unique outcrop is virtually unfoliated and preserves delicate primary sedimentary textures. The unusual colour and sculptured weathered surface of the outcrop are due to its composition dominated by ultramafic detritus.
