Macek, J. J., Zwanzig, H.V., and McGregor, C.R. 1999: Thompson Nickel Belt project: progress on a new compilation map of the Thompson Nickel Belt (parts of NTS 63G, 63J, 63O and 63P); *in* Report of Activities, 1999, Manitoba Industry, Trade and Mines, Geological Services, p. 14.

COMPILATION MAP PROGRESS

Work on a new compilation map of the Thompson Nickel Belt (Macek and McGregor, 1998) continued west of Setting Lake (Zwanzig, 1998, GS-6 this volume) and in areas covered by Phanerozoic rocks. The lithological map manuscript for area A (Fig. GS-4-1) was completed in previous years in cooperation with INCO Ltd. During the winter months of 1998-99, a lithological map was completed for area D in cooperation with Falconbridge Ltd. Another lithological map was completed this summer for area C in cooperation with Hudson Bay Exploration and Development Co., Ltd. The map for the area B was also finalized this summer (Zwanzig, GS-6, this volume). The lithological map for area E could not be finished as originally planned because the bulk of core from the area could not be examined for logistical reasons (see Macek et al., GS-5, this volume). Examination of this core will be initiated next summer and will be completed, if possible, in order to obtain the last batch of lithological data necessary for completing the Thompson Nickel Belt compilation map.

ACKNOWLEDGMENT

The support provided by staff of major mining companies is essential to this success of the project and is greatly appreciated. Work in the northern part of the project area benefited from the support of INCO Ltd. staff and in the southern part by Falconbridge Limited and Hudson Bay Exploration and Development Co., Ltd. staff. We also thank Eric Ducharme and Curtis Lettley for their excellent assistance in the field.
