

# Legend

- 2017 Study Areas
- Northern Limit of Phanerozoic
- Mineral Deposits**
- Base metals
- Gold
- Ni-Cu+/-Co+/-PGE
- Tungsten
- Lithotectonic Divisions**
- Burntwood Group
- Compositionally layered gabbro
- Intrusive and supracrustal gneiss
- Intrusive rocks
- Juvenile arc rocks
- Late intrusive rocks
- Missi Group
- Missi Group volcanic rocks
- Ocean floor rocks
- Orthogneiss derived from arc rocks
- Rocks of uncertain age
- Schist-Wekusko assemblage
- Synvolcanic mafic to ultramafic complexes
- Synvolcanic tonalite to granodiorite, granite
- Tectonite, phyllonite, mylonite
- Ultramafic rocks
- Unknown geochemical affinity
- Areas of no outcrop
